CHAPTER I.

EXPLANATION OF THE SYSTEM OF REGISTRATION.

THIS report deals with the trade registered on the rivers and canals of the Lower Provinces of Bengal, with the inland trade of Calcutta, and with the trade, inland and sea-borne, of Chittagong and the Orissa ports. It is based on the returns and reports noted on the margin.

1. Fortnightly return of traffic carried by country-boats along the Bhagiruthee, the Jellinghee, and the Matabhanga, commonly called the Nuddea rivers.
2. Fortnightly returns of traffic carried by country-boats on the Midnapore, Hidgellee, and Orissa canals, and the Orissa Coast canal.
3. Fortnightly returns of traffic carried to and from Calcutta by country-boats and carts registered at a cordon of 25 stations around Calcutta and Howrah.
4. Monthly statements of traffic carried along the Brahmaputra and Megna rivers by the steamers of the India General Steam Navigation Company, and the Rivers Steam Navigation Company.
5. Quarterly statements of traffic carried on the Megna river by the steamers of the Eastern Bengal State Railway.
6. Monthly statements of traffic carried along the Ganges, the Bhagiruthee, and the Hooghly rivers to and from Calcutta, by the steamers of the India General Steam Navigation Company, and the Calcutta Steam Navigation Company.
7. Quarterly statements of traffic carried by country-boats between Bengal and Assam registered at Bhoyrub bazar on the Megna river, and at Dhubri on the Brahmaputra.
8. Monthly and quarterly returns of traffic carried to and from Calcutta by the East Indian Railway, the Eastern Bengal State Railway, and connected lines.
9. Annual statements of the sea-borne trade of Calcutta.
10. Annual statements of the inland and sea-borne trade of Chittagong.
11. Annual statements of the sea-borne trade of Balasore, Pooree, and Cuttack.
12. Quarterly, half-yearly, and annual statements showing the wholesale prices per maund of all articles of trade ruling in 12 selected districts.
13. General Administration Reports submitted to Government by Commissioners of Divisions.
14. Special reports on trade submitted to Government by district officers.
15. Annual statement of the sea-borne trade and navigation of the Bengal Presidency published by the Collector of Customs, Calcutta.
16. Annual Report by the Board of Revenue, Lower Provinces, on the administration of the Salt Department.
17. Special reports submitted to Government by the local officers on the condition of the trade on the Nuddea rivers, the Calcutta, Midnapore, Hidgellee, and the Orissa canals, and the Orissa Coast canal.

Statistics relative to the rail-borne traffic of these provinces in 1887-88 are reviewed in a separate report entitled the "Report on the Rail-borne Traffic of Bengal." That report, besides furnishing an account of the rail-borne trade, internal and external, under the block system of registration, gives also statistics of the total traffic carried by the State Railways in these provinces, but the present compilation takes no account of rail-borne traffic except in Chapter X, which deals with the trade of Calcutta.

2. During the year under report, no change was made in the system under which the internal trade of the province is registered on some of the rivers and canals, and the mode of registration of the trade of Calcutta, Chittagong, and the Orissa ports also remained unaltered.

Trade along the chief routes.

3. The statistics which are furnished in Chapters II to IX of this report include—

The boat traffic registered on the Nuddea rivers.
The boat and steamer traffic registered on the Brahmaputra and Megna rivers.
The steamer traffic on the Ganges, the Bhagiruthee, and the Hooghly rivers.
The boat traffic registered on the Midnapore and Hidgellee canals.
The boat traffic registered on the Orissa canals and the Orissa Coast canal.
The boat traffic registered on the Calcutta canals.

4. The boat traffic on the Brahmaputra and Megna rivers, which crosses from Bengal into Assam and *vice versâ*, is registered at Bhoyrob Bazar and Dhubri under arrangements made by the Assam Administration, and the figures thus obtained have been incorporated with the statistics now submitted. The boat traffic on these rivers, which does not cross from one province to another, is unregistered. The steamers plying on the Brahmaputra and Megna rivers between Bengal and Assam belong to the India General Steam Navigation Company, the Rivers Steam Navigation Company, and the Eastern Bengal State Railway.

The steamers of the India General Steam Navigation Company continued to ply on the Ganges between Calcutta and the North-Western Provinces during the year under report. No steps have yet been taken to register the intermediate trade; but, in order to make the statistics of the trade of Calcutta as complete as possible, particulars of the traffic carried by these steamers to and from Calcutta during 1886-87 and 1887-88 have been obtained, and are embodied in this report.

The Calcutta Steam Navigation Company runs steamers between Calcutta and marts in the Burdwan, Midnapore, Hooghly, Nuddea, and Moorshedabad districts, and statistics of this trade also for the past two years have been obtained by Government from the records of the Company, and are published in this report.

The acknowledgments of the Lieutenant-Governor are again due to the Agents of all the Companies above named, for the courtesy with which they have invariably permitted their trade statistics to be used by Government.

Trade of large towns and commercial centres.

5. The inland trade of Calcutta, and the inland and sea-borne trade of Chittagong and of the Orissa ports, is described separately in Chapters X to XII. The entire inland traffic of Calcutta, imports as well as exports, carried by rail, by river steamer, by boat, and by road, is shown in this report. Comparative figures relating to the sea-borne trade of Calcutta in all the articles enumerated in the returns of internal trade are also given, but the sea-borne trade of Calcutta, coasting and foreign, is more fully dealt with in the annual report of the sea-borne trade and navigation of the Bengal Presidency published by the Collector of Customs, Calcutta. As regards the chief staples, the details furnished show how the imports into Calcutta by sea are distributed over the country, and from what parts of India the goods exported by sea came. The boat and road traffic of Calcutta is registered by means of a cordon of registering stations, 25 in number, placed on the Hooghly and on the canals and roads around Calcutta and the suburbs. For Chittagong, the returns exhibit the sea-borne trade, foreign and coasting, as well as that carried by country boats, while for the Orissa ports, the sea-borne trade only is registered.

Classification of commodities.

6. The classification of trade articles followed in this report is that which was prescribed in the Government of India's Revenue, Agriculture, and Commerce Department Resolution No. $\frac{2}{358-364}$, dated the 14th June, 1876, with some modifications made by the Government of Bengal. With a view, however, to the assimilation of the above list to that adopted for the registration of rail-borne traffic, a revised

classification list has been prepared on the lines of the list prescribed in the Revenue and Agricultural Department's Resolution No. $\frac{37 \text{ Stats.}}{35-21}$, dated the 23rd March, 1888, for the registration of rail-borne trade, with the addition of certain articles of provincial and local importance. The revised list has been brought into force from the 1st April, 1888. The articles omitted from, and those added to, the list of 1876, in order to make it accord as far as possible with that of 1888, are detailed below:—

Articles for which separate headings do not appear in the 1888 list, omitted from the 1876 list.

 2.—Manufactured.
 a.—Cigars.
 b.—Other sorts.

Valuation of commodities.

7. For the past year the values of all the articles of trade specified in the valuation statement appended have been assigned according to the system which has been explained in previous reports. In its Circular No. $\frac{45}{35-20}$ Statistics, dated the 9th May, 1888, the Government of India have made the following suggestions in regard to the system of assigning values to articles entered in the Rail-borne Trade Returns, in order to prevent discrepancies arising from the importing and exporting provinces adopting different value rates in respect of the same articles:—

(1) That for European merchandise exported inland the maritime provinces* should obtain the value rates from the Customs House; that for other articles the value rates of exports should be based on local prices and on the prices prevailing in the chief markets; and that the non-maritime provinces

* Madras. Bengal. | Sindh. Bombay.

should continue to circulate the values of their exports on the basis of local prices.

(2) That in the case of opium the actual cost of the article as manufactured for Government should be taken.

(3) That for articles included under the sub-head "Others," value rates should be ascertained once for all, and standard rates adopted; or that, of the articles coming under the sub-head "Others," those that are most largely exported from any province should be determined once for all by enquiries in the local markets, and their prices ascertained each year, the values being calculated according to the average prices each year.

(4) That for all articles of import *from British Provinces*, the value rates of the exporting provinces should be adopted.

(5) That for the trade *with Native States*, each Local Government and Administration should assign its own value rates as at present.

In a further communication* the Government of India have directed that for *ganja*, *bhang*, and *charas* which are included under the head "Intoxicating drugs other than opium," and which are heavily taxed under the excise law, the actual cost of these drugs, as manufactured for the market, should, as in the case of opium, be adopted for valuation purposes.

* Circular No. $\frac{76\ \text{Stats.}}{35\text{-}56}$, dated the 29th August, 1888.

The Government of Bengal has accepted the scheme as a whole, and effect has already been given to the instructions conveyed on points (4) and (5) in the preparation of the annual returns of rail-borne trade for 1887-88, while arrangements are being concluded for carrying out the remainder, and will be brought into effect in the valuation of future returns.

CHAPTER II.

GENERAL SUMMARY OF THE SEASONS AND RESULTS OF THE HARVESTS AND NOTICE OF PRICES.

General summary of the season.

The rainfall during the year was sufficient and well distributed in the Presidency, Rajshahye, Dacca, and Chittagong Divisions, but in the other divisions it was generally scanty and unseasonable.

2. Rice yielded a bumper harvest in the Dacca, and Chittagong Divisions, and in parts of the Rajshahye and Presidency Divisions, but in the Patna, Bhagulpore, and Chota Nagpore Divisions, and in portions of the Burdwan, Presidency, Rajshahye, and Orissa Divisions, the yield was below the average. On the whole, however, the outturn of rice in these provinces may be said to have been above the average. The yield of wheat on the other hand, fell short of the average, and the outturn of pulses, which was very good in Bengal, was below the average in Behar. The jute crop in the Rajshahye Division is said to have suffered from either excessive or unseasonable rainfall, the divisional average being only 10 annas, but in the Dacca Division the yield of this staple was nearly as good as in the preceding year, and in the Mymensing district it "was not only more copious, but better in quality." In the Presidency Division the crop was reported as being not below the average.

WHOLESALE PRICES OF AGRICULTURAL STAPLES.

3. The following statement shows the average wholesale prices of the principal agricultural staples, ruling in Bengal during 1887-88, as compared with the figures of the previous year:—

Cotton, raw.

4. The advance shown under raw cotton was owing to the fact that in the English market better prices were obtained in 1887 than in 1886, the improvement being due

to the operations of speculators in American cotton, and the consequent diversion of the attention of manufacturers to India.

Indigo.

As regards indigo, higher prices were obtained in Calcutta in consequence of stocks in London having been reduced by increased consumption in Europe and America.

Jute, raw.

The price of jute was kept up by the improved local demand for the Calcutta mills and,

Food-grains.

owing to good crops, the prices of food-grains were easy, but those of wheat, which suffered from insufficient rain and blight, were very irregular throughout the year.

Lac.

The decrease under lac was due to a dull market. The sea-borne trade returns show that there was no export of lac dye last year, the article being so little enquired after that none of it was offered for sale in the Calcutta market. Regarding the other sorts the Collector of Customs, Calcutta, remarks that "the outturn of lac for the past season in India was a good average one, while the stocks in London were large. Prices throughout the year were low, and the article was neglected in this market."

Oilseeds.

In the case of oilseeds, the fall in the price of linseed was due to a good harvest, while the rise in mustard seed was due to scanty crops. The increases observable under other kinds of oilseeds were normal, and need no special notice.

Ghee.

The fall in the price of ghee after the recent scare is satisfactory, and that in the price of drained and undrained sugar is the

Sugar.

result of the extension of sugarcane cultivation in these provinces.

Tea, Indian.

The figures for Indian tea were obtained from Tea Brokers in Calcutta, and the small increase shown above is satisfactory. These figures, however, do not correspond with those published in the annual accounts of the Sea-borne Trade and Navigation of the Bengal Presidency for the official year 1887-88, but the Collector writes:—"I put little trust in our values for tea during the past year, but hope for the current one to secure more reliable figures."

Tobacco.

The tobacco crop was on the whole a good one last year, but, the demand for exports by sea to European countries being slack, there was no fluctuation in the price.

RETAIL PRICES OF FOOD-GRAINS.

Of the cereals named above, wheat was the only one in the price of which there was a rise (·76 per cent.) as compared with the average of the three

previous years. The price of barley fell by 25·87 per cent., that of the best description of rice, by 10 per cent., that of common rice by 19·24 per cent., that of marwa by 16·25 per cent., that of maize or Indian-corn by 21·41 per cent., and that of gram by 11·5 per cent.

The following table shows in what districts the price of common rice was lowest:—

7. The increase in the price of dressed and undressed hides was due to the fact that the demand for these articles in the Calcutta market was throughout the year under report keener than the condition of the leather trade in Europe would seem to have warranted. A very small supply of dressed and undressed skins was shipped to the United States from Calcutta last year; but, on the other hand, there was a considerable falling off in the imports into Calcutta of raw and tanned skins from the Madras Presidency. The increases shown above are, therefore, attributed to the exigencies of the metropolitan market in connection with the increased local demand. The exports of horns to the United Kingdom were larger than in any of the

Hides and skins.

Horns.

preceding years since 1883-84, and this circumstance must have tended to keep up prices in the Bengal market. **Cutch.** Cutch is brought to Calcutta from the forests in Burma, and a very large business was done last year in this article, the exports to the United States being 145 per cent. higher than in 1886-87. The Customs returns show that the Calcutta market rates for cutch ruled high throughout the year, and there was a ready demand for whatever was offered for sale. **Metals.** The increase under "Other metals" was due to several causes. The rise in the value of lead was in sympathy with that in the value of tin and copper brought about by speculators. There was also a considerable rise in the value of quicksilver, owing, it is said, to the general revival of trade, and the consequent rise in the value of most articles. The rise in the value of steel was owing to the fact that this metal is more in demand for bale hoops than it used to be, as the cost of it relatively to iron is less than formerly, and it is said to be lighter and more durable. As regards zinc or spelter, the prices rose in the United Kingdom owing to a demand for the purpose of galvanizing iron. **Umbrellas.** The Collector of Customs, Calcutta, states that "there was a good demand for umbrellas before the setting in of the wet season, especially for black covered ones, which are more durable, and are now preferred to any other kind. The trade has, speaking generally, been profitable, and at one time the stocks were exhausted. In recent years the quality of the umbrellas imported has greatly improved, the steel frames and handles being lighter, stronger, and better got up." **Myrabolams.** Last year the trade in myrabolams was in a depressed condition, the exports by sea from Calcutta having declined over 36 per cent., with a corresponding fall in value, which the Collector remarks "only means that more must have gone direct from other Indian ports, as the exports from India have been above the average ones." **Indigo seed.** Simultaneously with the falling off in the price of indigo seed, there has been a marked decrease in the downward traffic from Delhi in this article, due to "crops having been retarded and damaged by rains," and to short requirements in Tirhoot for second sowings.

It will be seen that the total weight of the trade of 1887-88 carried both ways was 3·92 per cent. below that of the preceding year, but 5·83 per cent. over the figures for 1885-86. The returns of the Nuddea station alone showed an increase, the quantity registered being 7·31 per cent. over the figures of 1886-87, and 41·52 per cent. over those of 1885-86. This increase last year was mainly due to the diversion of the trade from the Bhaguruthee to the Jellinghee route in consequence of the shallowness of the former river in several places during the latter part of the year both above and below Jungipore.

2. Of all the staples in the down-stream traffic, gram and pulses showed the largest increase, namely, 2,95,989 maunds as compared with 1886-87, and 5,35,843 maunds as compared with 1885-86. The next most important item is linseed, which advanced by 1,41,362 maunds on the returns for 1886-87, but the

figures were still below those of 1885-86 by 2,16,351 maunds. The articles in which the decrease was most conspicuous are mustard seed (2,90,124 maunds), jute (2,63,108) maunds, timber, wheat, and tobacco. The number of laden boats passing the Nuddea rivers during the past three years was as follows :—

The difference between the down and up-going boats is explained by the fact that empty and passenger boats are not included in the trade returns.

* Manufactures of silk are shown according to value in rupees.

The details of the Calcutta trade, which are shown in the foregoing statement, will be separately dealt with in chapter X of this report, and the following paragraphs notice briefly the chief articles of traffic by this route.

4. *Jute, raw.*—Compared with 1886-87, the quantity carried *viâ* the Jellinghee showed a decrease of 1,08,966 maunds, and that carried *viâ* the Matabhanga of 1,50,572 maunds. The decline under the former route was due to short despatches from Dulalgunge (in the Purneah district), which sent its supplies to Bhuddressar by rail, its exports by country boats to that mart being 1,81,430 maunds, against 2,37,803 maunds in 1886-87. The falling off under the latter was owing to a short outturn of jute in Northern Bengal in consequence of either unseasonable or excessive rainfall. The quantity shipped for Calcutta by this route was 5·29 per cent. of the total imports by all routes.

5. *Gunnies.*—Last year the trade in hand-made gunnies showed an improvement over the figures of 1886-87, but it was still below the trade of 1885-86 by 120,696 bags. The increase is attributed to larger exports from the Purneah and Dinagepore districts, where there is a large manufacture of gunnies carried on by handlooms. The number of bags despatched to Calcutta was 108,797, and to other places 45,637, of which 21,300 bags were carried to Bhuddressar, chiefly from Dulalgunge.

6. *Wheat.*—The total decrease under this head amounted to 97,887 maunds on the returns of 1886-87, the chief fluctuations being an increase of 1,25,223 maunds in the shipments from Behar, and a decrease of 54,462 maunds and 1,65,816 maunds in those from Western and Eastern Bengal, respectively.

The different trade blocks from which the supply during the past two years was received are shown in the subjoined statement:—

Of the districts comprised in the Behar block, the supplies from Monghyr increased by 61,800 maunds, and those from Bhagulpore and Durbhunga by 29,725 and 27,248 maunds, respectively. Moorshedabad in Western Bengal contributed 60,267 maunds less than in the previous year, while the shipments from Nuddea in the Eastern Bengal block aggregated only 3,79,190 maunds against 5,44,926 maunds, showing a decrease of 1,65,736 maunds. In Moorshedabad, there was a deficiency of cold-weather rain, and the rubbee crops suffered somewhat in consequence. In Nuddea also the weather last year was somewhat abnormal, but the wheat crop is said to have been particularly fine in the west of the district.

The quantity shipped for Calcutta by this route was 18·22 per cent. of the total imports, against 76·50 per cent. attracted to the East Indian Railway, and 2·82 per cent. to the Eastern Bengal State Railway.

7. *Gram and pulse.*—The increase shown in the previous year's report was maintained, and still further extended during 1887-88. The entire supply during the past two years was shipped from the trade blocks mentioned below:—

The most noticeable increase under the Eastern Bengal block occurred in the consignments from the Nuddea district, which exported as much as 5,67,142 maunds during the year, against 3,28,007 maunds in 1886-87. It is stated that generally all pulses yielded well in this district, and the Commissioner of the Presidency Division makes the following remarks:—

"The long holding off of the cold-weather showers caused some apprehension and did some damage, but the rain did come just in time to save the plant, whilst the unusually bright sunny weather and absence of fogs made the produce very fine in quality. In localities which were most affected by the continued want of rain in December and early part of January, insects caused some damage, but luckily their ravages were confined to small areas"

Of the districts in Northern Bengal, Pubna supplied 47,951 maunds against 16,521 maunds in 1886-87, and Rajshahye 99,145 maunds against 73,670 maunds. From Maldah, shipments fell off from 53,747 maunds in 1886-87 to 35,868 maunds in 1887-88. The outturn of the crops during the year in this district, however, was good, and the *kalai* was a splendid crop. Last year the total imports of these cereals into Calcutta by all routes amounted to 53,39,205 maunds, 27·91 per cent. of which was conveyed by the East Indian Railway, and 22 88 per cent. by the Eastern Bengal Railway, while the Nuddea rivers route contributed 21·82 per cent. against 20·59 per cent. in the previous year.

8. *Other spring crops.*—The figures under this head showed an advance of 16·62 per cent. on the returns of 1886-87, and of 2 58 per cent. on those of 1885-86. The following statement shows the different trade blocks from which miscellaneous spring crops were exported during the past two years:—

The falling off in the exports from Behar is attributable to short shipments from Patna (1,532 maunds against 23,881 maunds), and Shahabad (2,152 maunds against 14,002 maunds) as compared with the previous year, while the increase shown under the other blocks represents improvement in the supplies drawn from Nuddea 69,999 maunds), Moorshedabad (36,230 maunds), and Maldah 24,884 maunds . This trade was for the most part with Calcutta.

9 *Rice and paddy.*—The total quantities of rice and paddy registered during the past three years were as follows:—

The traffic during the past year was equal to that of 1886-87.

The several trade blocks which contributed to the rice trade during 1886-87 and 1887-88 are detailed below:—

The largest decrease occurred in the supplies exported from Northern Bengal, where the year was not quite so favourable for agriculture as the preceding one. The *hymunti*, which is the main crop, suffered to some extent in Pubna and Dinagepore, and the latter district shipped by this route 3,62,087 maunds against 4,70,811 maunds in 1886-87. The quantity brought down to Calcutta was 8,89,767 maunds, and the distribution of the remaining 69,357 maunds is shown in the following statement:—

Last year the quantity of rice carried to Calcutta by this route was 5·43 per cent. of the total imports by all routes, against 5·88 per cent. in the previous year.

10. *Mats.*—The total registered value of mats was Rs. 4,268 below the figures of 1886-87, and Rs. 2,119 below those of 1885-86, the decrease being explained by the circumstance that large quantities of the previous year's importation into Nuddea were unsold and remaining in stock.

11. *Oilseeds.*—The following figures indicate the trade in oilseeds registered during the past three years:—

	1885-86.	1886-87.	1887-88.

There was some recovery in the linseed trade of the past year as compared with 1886-87, but the figures are still below those of 1885-86 by 2,16,351 maunds. In the following statement the total quantity carried down-stream during 1886-87 and 1887-88 is distributed according to the different trade blocks from which the supplies were exported:—

By far the largest increase occurred in the consignments from the Behar block Compared with 1886-87, the exports from Durbhunga increased by 50,067 maunds, those from Monghyr by 26,741 maunds, and those from Bhagulpore by 22,581 maunds. The advance under Northern Bengal is attributable to larger exports from Purneah (45,826 maunds against 30,150 maunds), and Maldah (30,945 maunds against 18,992 maunds). The supply of linseed carried by this route formed but a small fraction (11·44 per cent.) of the total quantity imported into Calcutta by all routes during the year under report.

Under mustard seed, however, the fluctuations in the total quantity registered during 1887-88 were marked. The crop during 1886-87 was said to have been below the average. The statement below shows the quantities exported from each trade block during the past two years:—

Owing to poor crops, the exports from Behar fell off by 34·98 per cent. during the past year. From Bhagulpore, the shipments declined from 2,18,824 maunds in 1886-87 to 1,42,673 maunds in 1887-88. The decrease under Monghyr amounted to 60,712 maunds, and under Durbhunga to 20,395 maunds. As regards Northern Bengal, the consignments from Purneah amounted to only 88,693 maunds, against 1,95,051 maunds in 1886-87. The Annual General Administration Report of the Rajshahye Division for 1887-88 gives the following account of the mustard crop of the year in that Division—

"Mustard suffered generally from want of rain in December. In Pubna, the short outturn of the cold weather crops is accounted for by the fact that the rivers subsided too late for early sowings, which are essential for good harvests."

Last year the total quantities of linseed and mustard seed carried to Calcutta by boat along the Nuddea rivers were 11·44 per cent. and 21·87 per cent., respectively, of the total imports of these seeds by all routes.

12. *Silk, raw.*—The silk trade amounted to 255 maunds, showing an increase of 114 maunds on the trade of 1886 87, and a decrease of 381 maunds on that of 1885-86. The entire supply represents the local trade of the Moorshedabad district, with the exception of 49 maunds, which were exported from Maldah, and were destined for the marts of Khagra, Jungipore, and Argorah, in the Moorshedabad district.

13. *Silk manufactured.*—The total registered value of these goods was Rs. 6,000, or Rs. 9,200 less than in 1886-87, and Rs. 32,350 less than in 1885-86. The traffic is entirely local between Sibgunge in Maldah, and Khagra in the Moorshedabad district.

14. *Sugar, drained.*—Owing to larger exports from the Ghazipore district, the figures for the past year showed an advance of 3,158 maunds over the trade of 1886-87, and 1,449 maunds in excess of that of 1885-86. The large annual import of foreign sugar into Calcutta has tended to diminish the demand for country-made sugar for metropolitan consumption. The quantity shipped for Calcutta by this route was merely 1·03 per cent. of the total imports by all routes.

15. *Sugar, undrained.*—Under this head a decrease is shown of 15,704 maunds as compared with the previous year, and an increase of 5,809 maunds as compared with 1885-86. Of the total supply during the past year, Calcutta imported 24,447 maunds, while the remainder (7,211 maunds) was sent to Moorshedabad, 5,141 maunds to Burdwan, 2,999 maunds to Hooghly, and 1,493 maunds to other districts.

16. *Tobacco.*—The total quantity carried downwards was 1,58,605 maunds, against 2,01,829 maunds in 1886-87, and 1,55,408 maunds in 1885-86. The outturn of tobacco during 1887-88 is said to have been better than in the preceding year in all the districts of the Rajshahye Division, except in Darjeeling. Last year, the tobacco season was a bad one in Behar.

The Calcutta consignment during the past year was only 48,822 maunds, and the remainder (1,09,783 maunds) was distributed as follows :—

17. *Timber.*—There was again a large falling off in this trade, the total quantity being 57,967 maunds, against 1,60,960 maunds in 1886-87, and 2,02,656 maunds in 1885-86. The decrease is attributable to the slack demand for boat building purposes. Of the past year's trade, Calcutta received 36,727 maunds, Hooghly 14,692 maunds, Moorshedabad 2,634 maunds, and other districts 3,914 maunds.

18. *Up-stream traffic.*—The trade in the principal articles carried up-stream during the past three years is exhibited in the following statement :—

19. *Coal and coke.*—The total quantity of coal carried up-stream was 2,56,066 maunds, against 2,18,048 maunds in 1886-87, and 2,04,978 maunds in 1885-86, the increase being due to the consignment by country-boats by Messrs. Hoare, Miller and Company of a large quantity of coal for the Jeagunge and Cutwa line. The following districts imported coal largely during the past year—

20. *Cotton piece-goods, European.*—This trade fell from Rs. 6,88,270 in 1885-86 to Rs. 30,250 in 1886-87, and Rs. 19,772 in 1887-88. The large traffic during 1885-86 was due to the temporary divergence of the trade from the railway to country boats on account of the stoppage in September, 1885, of the through-booking of goods with the Eastern Bengal State Railway, consequent upon serious breaks on that line caused by floods. As a rule, piece-goods are exported from Calcutta by rail, and the decrease observable in the boat traffic was expected. The following statement furnishes the details of the trade during the year :—

21. *Gunny-cloth.*—Under this head the figures show a decrease of 121,988 pieces on the returns of 1886-87, but an increase of 137,708 pieces on those of 1885-86. During the past year the business of the Calcutta jute mills is said to have been satisfactory. The supplies exported from Calcutta were 505,689 pieces, and from other districts 42,051 pieces and the destination of these exports is given below:—

Large quantities of rice and other food-grains were despatched from Bengal last year by rail to meet the requirements of up-country stations, in which there was a scarcity of food. The demand from Nuddea was also limited. The decrease shown above does not, therefore, indicate any real falling off in this trade. The following statement shows all the exporting districts and the places of destination in respect of the past year's supply:—

23. *Iron and its manufactures.*—The total quantity amounted to 47,019 maunds, against 40,624 maunds in 1886-87, and 54,411 maunds in 1885-86. Of the past year's supply, 43,195 maunds were exported from Calcutta, and 3,824 maunds from other places. The different districts which imported the largest quantities are named below:—

CHAPTER IV.

TRAFFIC ON THE GANGES, THE BHAGIRUTHEE, AND THE HOOGHLY RIVERS CARRIED BY INLAND STEAMERS.

The year under report was the second year of the registration of the traffic carried to and from Calcutta by the steamers of the India General and the Calcutta Steam Navigation Companies, plying on the Ganges, the Bhagiruthee, and the Hooghly. The different stations opened by these companies respectively are noted below.

2. The total traffic imported into Calcutta from, and exported from Calcutta to, the stations mentioned above by the steamers of the River Steamer Companies along the Ganges and the Hooghly rivers during the past two years, is shown in the subjoined statement:—

The aggregate quantity carried both ways last year showed a decrease of 6,03,506 maunds, or 37·81 per cent. as compared with 1886-87, the number of trips made in 1887-88 being only 17 against 27 in the preceding year. The fall in the import trade amounted to 35·65 per cent and in the exports to 42·15 per cent. The decline occurred chiefly in the trade (both import and export) with Behar, the figures in all other cases exhibiting an increase. The falling off in the imports from Behar was for the most part due to the contraction of the wheat trade, which alone accounts for a decrease of 60·73 per cent., the season having been an abnormal one for this trade, and the scarcity of food

grains in the North-West Provinces having interfered with the exports of wheat by sea. Linseed and mustard seed taken together also showed a decline of 37·14 per cent. In the exports to Behar 81·98 per cent. of the decrease referred to salt, 74·48 per cent. to metals, especially iron, and the remainder to other articles. The following statement shows all the most important articles of merchandise conveyed by the River Steamer Companies during the past three years:—

3. In the import trade, the largest decrease will be found in wheat (2,18,856 maunds), mustard seed (84,956 maunds), gram and pulse (37,186 maunds), saltpetre (27,057 maunds), and betelnuts (23,205 maunds), while in exports, salt showed a falling off of 83,723 maunds, and iron of 48,500 maunds. Detailed statements in connection with this trade are published in the appendices attached to this report.

2. The aggregate quantity registered during the past year showed a decrease of 57·28 per cent. as compared with 1886-87, and 19·47 per cent. as compared with 1885-86. The import trade showed an increase of 11·12 per cent. as compared with the figures of the previous year, but a decrease of 11·62 per cent. as compared with the figures of 1885-86. The export trade during 1886-87, exclusive of bamboos, amounted to 2,74,385 maunds, or 17·77 per cent. below the figures for 1887-88, which again showed a decrease of 42·06 per cent. as compared with those of 1885-86. Last year the exports of bamboos aggregated only 417,000, or 83,400 maunds, (at the rate of five bamboos to a maund), against 12,630,000 in number, or 25,26,000 maunds in 1886-87, and hence the large falling off under this head. The largest increase in the year's traffic occurred in paddy (1,88,880 maunds), cocoanuts (149,730 in number), timber (25,079 maunds), rice (23,703 maunds), gram and pulse (10,915 maunds), iron (10,620 maunds), and spices (4,010 maunds).

CHAPTER VI.

BOAT TRAFFIC ON THE MIDNAPORE AND HIDGELLEE CANALS.

THE total weight and value of the country-boat traffic registered on the Midnapore and Hidgellee canals during the past three years are given in the subjoined comparative statement :—

2. The total traffic upon this route during the past year showed a decrease of 1·09 per cent. as compared with 1886-87, and of 11·54 per cent. as compared with 1885-86. The following statement is taken from the report of the Executive Engineer, Cossye Division :—

"Although the canal is now re-opened thoroughly cleared, in another two years it will be again choked, and it can never be expected to show better results until steps are taken to remedy the evils existing, which besides affecting the returns of the canal proper, most injuriously affect the returns of the coast canal at a most critical state of its existence."

3. The money-value of the trade showed a decrease of 6·34 per cent. and 26·35 per cent. as compared with the years 1886-87 and 1885-86, respectively. Of the 139½ lakhs of rupees worth of goods carried by these canals, as much as 27½ lakhs consisted of rice. The next most valuable commodities were paddy, which was valued at nearly 16¼ lakhs of rupees, European cotton twist and yarn at 15¾ lakhs of rupees, and salt at 14¾ lakhs of rupees. Next to these come in order brass and copper, the trade in which was valued at 10¾ lakhs; tobacco, valued at 6½ lakhs, undrained sugar at 4¼ lakhs, and diverse other kinds of provisions and oils at 4 lakhs each. Of the entire traffic, 85·13 per cent. was carried to and from Calcutta. As regards staples, the traffic in rice, as compared with 1886-87, showed the largest increase, and the articles in which the decrease was most marked were paddy, salt, timber, and brass and copper. The total number of laden boats, the cargoes of which were registered during the past three years, was as follows—

The details in respect of the Calcutta trade are considered elsewhere in this report. The following remarks relate only to the fluctuations in such items of the local traffic as are of importance.

6. *Cotton piece-goods, Indian.*—The trade in Indian piece-goods amounted to Rs. 1,49,850 against Rs. 1,21,000 in 1886-87, and Rs. 1,98,750 in 1885-86. Excluding the Calcutta portion of the trade, there remained Rs. 3,250 worth of goods, which found their way to Kharooberiah in Hooghly from Shamgunge in the Midnapore district.

7. *Fruits, nuts, and vegetables.*—The total quantity registered under this head amounted during the past year to 76,218 maunds against 59,654 maunds in 1886-87, and 83,941 maunds in 1885-86. The amount of the Calcutta trade was 69,802 maunds, while the remaining 6,416 maunds were distributed as follows:—

The rice trade showed a satisfactory increase during the past year; but in the case of paddy a large decrease of 3,60,384 maunds in comparison with 1886-87 is observed. The consignments to and from Calcutta amounted to 11,02,196 maunds of rice and 4,72,932 maunds of paddy; of the remainder, 1,05,625 maunds of rice and 5,22,988 maunds of paddy represent the local trade of the Midnapore district, as detailed below:—

9. *Oils.*—The total traffic in oils rose from 71,378 maunds in 1885-86 and 76,935 maunds in 1886-87, to 89,963 maunds in 1887-88. The supply despatched to and from Calcutta amounted to 54,574 maunds, while 34,784 maunds were exported to Midnapore and Hooghly from the 24-Pergunnahs.

10. *Provisions, other than ghee.*—The increase noticed in the last report was further improved during 1887-88, the total quantity amounting to 42,574 maunds against 38,020 maunds in 1886-87, and 29,245 maunds in 1885-86. The amount of the Calcutta trade during the past year was 40,211 maunds, while 2,363 maunds represent the local trade of the Midnapore district, and the trade between Midnapore and the Hooghly district.

11. *Silk, raw.*—The trade in raw silk was 31·5 maunds below the total of 1886-87, and 41 maunds less than in 1885-86. Last year the quantity imported into and exported from Calcutta through these canals was 350 maunds, while the trade of the other districts was 310 maunds. Of this latter item, 140 maunds represent the local trade of the different marts in the Midnapore district.

12. *Sugar, undrained.*—Undrained sugar showed a large advance of 39,439 maunds on the trade of 1886-87, but it was still less than that of 1885-86 by 8,602 maunds. The Calcutta portion of the trade amounted to 96,601 maunds, and of the remainder, 4,625 maunds comprised the local trade of the Midnapore district; the trade between Midnapore, Hooghly and the 24-Pergunnahs aggregated 5,227 maunds.

13. *Tobacco.*—The quantity of tobacco registered was 85,123 maunds, showing a decrease of 6,543 maunds and 18,662 maunds in comparison with 1886-87 and 1885-86, respectively. The amount of the Calcutta trade was 80,762 maunds, and of the remainder, the local trade of the Midnapore district accounts for 1,154 maunds.

14. *Timber.*—The total trade in timber amounted to 85,655 maunds, against 1,14,014 maunds in 1886-87 and 69,757 maunds in 1885-86. The quantity comprising the local trade of the Midnapore district was 62,020 maunds, the supply sent to and from Calcutta was 20,024 maunds, and the remainder (3,611 maunds) represents the trade between Midnapore and Hooghly.

CHAPTER VII.

BOAT TRAFFIC ON THE ORISSA CANALS.

The following statement exhibits the total weight and value of the traffic conveyed through the Orissa canals, during the past three years:—

1	2	3	4	5	6	7

2. The total weight of goods carried during the past year was on a level with that of the preceding year, but it was 37·69 per cent. less than the trade of 1885-86. In reporting upon the general condition of the trade carried along these canals, the Executive Engineer, Brahmini-Byturni Division, writes:—

"Through communication between Calcutta and Cuttack by inland service was opened in September, 1887, with the completion of the coast canal. Steam launches now ply *viâ* this canal, the rivers Motai and Brahmini, and Kendrapara canal. An agreement has been arrived at between the Calcutta Steam Navigation Company of Messrs. Hoare Miller and the Indian General Steam Navigation Company to maintain a joint service, the former running to end of coast canal, and the latter to Cuttack with through tickets. Shipments of jute have increased considerably and hides and timbers have maintained the average.

"The firm of Messrs. Bullock and Company, the pioneers of private steamer enterprise in Orissa, failed during the year; but their boats have been bought up by other firms and will probably continue to run The Government transport service on the High Level canal has been interrupted for many months on account of the steamers being laid up for repairs."

3. The number of laden boats, registered on these canals during the past three years, was as follows:—

BOAT TRAFFIC ON THE ORISSA COAST CANAL.

6. The following figures give the total quantity and value of the traffic conveyed by country boats along the Orissa Coast Canal during the past two years.

	1886-87.		1887-88.	
	Quantity.	Value.	Quantity.	Value.
	Mds.	Rs.	Mds.	Rs.

Total ...	7,58,388	16,18,623	12,84,377	29,34,715

7. The Executive Engineer, Balasore Division, observes:—

"It will be seen from the revenue derived from Range III, which was opened to traffic during the last full two years (1886-87 and 1887-88), and from the revenue derived from the other three Ranges (IVA, IVB, and V) of the coast canal which were opened for about eight months during the year under review, that there is every indication of this excellent beginning developing into a prosperous future, now that the other ranges will be opened throughout the year, and the more so when the Hidgellee Tidal Canal is remodelled and the line of communication opened throughout permanently.

8. The number of loaded boats registered during the past two years, was as follows:—

	Down.	Up.	Total.
	No.	No.	No.
1886-87	4,747	4,716	9,463
1887-88	6,212	6,021	12,233

9. The distribution of the trade, district by district, during the past two years, was as follows:—

	1886-87.		1887-88.	
	Imports.	Exports.	Imports.	Exports.

Compared with 1886-87 the import trade of Calcutta rose by 40·81 per cent., that of Balasore by 788·16 per cent., and that of Midnapore by 57·39 per cent. As regards exports, the increase under Midnapore was 28·34 per cent., that under Balasore 123·76 per cent., and that under Calcutta 155·22 per cent.

CHAPTER VIII.

BOAT TRAFFIC ON THE CALCUTTA CANALS.

The total quantity and value of the trade of Calcutta carried by country boats along the Calcutta canals during the past three years are given in the following statement:—

	Quantity of goods registered by weight.			Value of all articles of trade.

Boats which have been loaded, or are to be unloaded, at the Port Commissioners' wharves on the Hooghly, are registered by the Port Commissioners and consequently are not registered at the canal stations.

2. The foregoing statement shows an expansion of traffic, the total quantity registered being 19,48,871 maunds, or 10·81 per cent. in excess of the figures of 1886-87, and 28,52,726 maunds, or 16·66 per cent. in excess of those of 1885-86. The improvement was entirely in the import trade, the chief staples showing an increase being rice (19,94,877 maunds) paddy (4,25,671 maunds), gram and pulse (3,23,708 maunds), raw jute (1,88,404 maunds), fruits and vegetables (68,197 maunds), miscellaneous spring crop (31,715 maunds), and betelnuts (28,917 maunds). In the export trade, which fell off by 5,54,531 maunds and 3,77,458 maunds in comparison with the two previous years, respectively, the largest decrease was in oils (2,30,903 maunds) mustard seed (31,905 maunds), and iron (23,601 maunds), while unrefined sugar showed an increase of 7,523 maunds. Detailed statements of this traffic will be found among the appendices to this report.

CHAPTER IX.

TRAFFIC ON THE BRAHMAPUTRA AND MEGNA RIVERS, INTERNAL AND EXTERNAL (WITH ASSAM).

As stated in previous reports, statistics of traffic on the Brahmaputra and Megna rivers are, under existing arrangements, limited to a record of the trade under the following three heads:—

(1) Traffic carried by the River Steamer Companies;
(2) Traffic carried by the steamers of the Eastern Bengal State Railway; and
(3) Trade of Bengal with Assam carried by country boats.

2. A consolidated statement showing the river-borne trade of Bengal with the Brahmaputra and Surma valleys of the Province of Assam carried by steamer, as well as by country boat during the past year, will be found in the appendix to this report. A short review of the trade carried by inland steamers and country boat is, however, given below separately under each of the heads above mentioned.

RIVER-BORNE TRAFFIC CARRIED BY THE RIVER STEAMER COMPANIES.

3. The total quantity and value of the merchandise, carried along the Brahmaputra and the Upper Megna rivers by the steamers of the India General and Rivers Steam Navigation Companies, during the past three years, were as follows:—

Last year, the total increase in the quantity of goods carried both ways was 7·54 per cent. on the returns of 1886-87, but the figures were below the trade of 1885-86 by 2·46 per cent. The upward traffic remained the same as in the previous year, but the downward traffic rose by 10·86 per cent. On the other hand, the total traffic along the Brahmaputra showed little or no change during the past two years, while that along the Megna increased by 4,48,673 maunds, or 19·83 per cent. Analysing the figures for Bengal and Assam separately,

the result shows an increase of 7·43 per cent. in imports, and a decrease of 36·99 per cent. in exports as regards Bengal, but an increase of 19·65 per cent. in imports, and of 16·23 per cent. in exports as regards the Assam trade.

4. The different articles which showed an improvement over the trade of the preceding year were :—European piece-goods (Rs. 10,77,596), jute raw (1,71,276 maunds), rice, husked (72,315 maunds), mustard seed (1,37,465 maunds), Indian tea (1,01,755 maunds), and salt (83,017 maunds). On the other hand, the staples which exhibited a marked decrease were coal and coke (1,47,392 maunds), drugs and medicines (Rs. 1,22,222), hides of cattle (11,368 pieces), liquors (Rs. 2,89,083), oils (70,707 maunds), and treasure (Rs. 95,950). The usual statement showing all the principal staples of traffic carried by this route during the past three years, is subjoined :—

Columns 8 to 13 of the above statement show the proportion borne by the Calcutta traffic to the total trade; the details of this trade will be explained in Chapter X.

5. *Caoutchouc or India-rubber.*—An increase of 3,377 maunds is shown in the total traffic under this head as compared with 1886-87, and of 741 maunds as compared with 1885-86. Apart from the Calcutta traffic, 7,202 maunds against 1,579 maunds were sent from Assam to Goalundo, and nothing to Naraingunge against 60 maunds in 1886-87.

6. *Coal.*—The increase shown during 1886-87 was not maintained during the year under report, the total quantity registered being 4,88,788 maunds against 6,36,180 maunds in the preceding year, and 4,43,223 maunds in 1885-86. Last year the exports from Calcutta to Northern Bengal amounted to 20,514 maunds only, against 2,23,509 maunds in 1886-87, the falling off being due to the fact that coal was sent there in large quantities by rail *viâ* the Jubilee Bridge direct from the coal mines in Western Bengal. The exports from Calcutta to Assam amounted to 1,68,995 maunds, against 1,50,728 maunds in 1886-87, while in the supplies carried from Assam to Bengal there was little or no change, as the following statement will show:—

7. A falling off of Rs. 1,22,222, or 39·50 per cent., occurred in the value of non-intoxicating drugs and medicines registered during the past year as compared with 1886-87, but the figures were in excess of the trade of 1885-86 by

Rs. 66,565, or 55·94 per cent. The decrease was chiefly in the exports to Assam from Calcutta, which amounted in value to Rs. 1,65,130 during the past year, against Rs. 3,02,616 in 1886-87, and Rs. 1,09,250 in 1885-86.

8. *Cotton piece-goods, European.*—The total value of piece-goods sent to Assam from Bengal aggregated Rs. 44,94,798, against Rs. 35,80,731 in 1886-87, and Rs. 40,28,662 in 1885-86. Last year the exports from Calcutta were valued at Rs. 21,69,468, and those from Eastern Bengal at Rs. 23,25,330. This latter supply was carried from Goalundo by the despatch service of the India General Steam Navigation Company, the consignments being originally made from Calcutta by rail. The total supply in connection with the internal trade rose from Rs 56,21,761 in 1886-87 to Rs. 66,99,357 in 1887-88.

9. *Jute, raw.*—The jute trade rose by 1,71,276 maunds as compared with 1886-87, and fell off by 3,748 maunds as compared with 1885-86. The increase in the internal trade of Bengal amounted to 1,69,643 maunds, chiefly in the imports to Calcutta from Naraingunge. The supplies carried to Calcutta from Assam were 36,420 maunds, against 34,859 maunds in 1886-87.

10. *Gunnies*—The total traffic during the past year very closely approximated that of 1886-87, but the figures show a heavy falling off in comparison with those of 1885 86. In the exports to Assam from Bengal, the figures rose from 4,187 bags in 1886-87 to 17,045 bags in 1887-88, while in the internal trade the despatches from Calcutta to the Northern and Dacca blocks aggregated only 4,473 bags, against 28,662 bags in 1886-87.

11. *Gram and pulse.*—There was a slight recovery in the total trade as compared with 1886 87, but the figures are still below those of 1885-86 by 38,808 maunds. The supply carried to Assam from Bengal amounted to 1,65,685 maunds, against 1,50,745 maunds in the preceding year. The internal trade of Bengal under this head is unimportant.

12. *Rice*—The total trade in rice amounted during the past year to 4,24,367 maunds, showing an increase of 72,315 maunds on the totals of 1886 87, and a small decrease of 32,310 maunds as compared with those of 1885-86. The increase occurred in the exports to Assam, as will be seen from the details given below:—

The total quantity of the internal trade of Bengal carried by inland steamers amounted to only 3,274 maunds, against 12,878 maunds in the previous year.

13. *Hides.*—The registered hide trade fell off from 1,52,237 pieces in 1885-86, and 21,704 pieces in 1886-87, to 10,336 pieces in 1887-88. The consignments from Assam to Bengal aggregated 10,336 pieces against 21,704 pieces in 1886 87, and 16,463 pieces in 1885-86, while in connection with the internal trade of Bengal the returns were altogether blank.

14. *Liquors.*—The total value of this trade amounted to Rs. 8,80,290, showing a decrease of Rs. 2,89,083 as compared with 1886-87, and of Rs. 3,84,889 as compared with 1885-86. The exports to Assam from Bengal, chiefly Calcutta, were valued at Rs. 8,07,097, against Rs. 10,88,732 in the preceding year; in the internal trade of Bengal, the figures fell off from Rs. 80,641 in 1886-87 to Rs. 73,193 in the year under report.

15. *Provisions.*—The trade under this head remained stationary; the total quantity registered during the past year being 61,510 maunds, against 61,238 maunds in 1886-87, and 54,355 maunds in 1885-86. The exports to Assam

amounted to 56,698 maunds, against 58,064 maunds in 1886-87. Of this former quantity, Calcutta contributed 32,427 maunds, against 47,883 maunds in 1886-87, Goalundo 16,760 maunds, against 9,735 maunds, and other districts 204 maunds, against 446 maunds in the preceding year.

16. *Mustard seed.*—Compared with 1886-87, the total quantity of mustard seed showed an advance of 1,37,465 maunds, but it was still below the figures for 1885-86 by 2,78,249 maunds. The supply shipped for Calcutta from Assam amounted to 3,37,044 maunds, against 2,19,200 maunds in 1886-87, while in the internal trade of Bengal the figures rose from 45,226 maunds in 1886-87, to 66,829 maunds in 1887-88.

17. *Treasure.*—Transactions under this head during the past year were limited to Rs. 2,91,500, against Rs. 3,87,450 in 1886-87, and Rs. 17,43,860 in 1885-86. Last year the exports to Assam from Bengal amounted to Rs. 2,80,500, against Rs. 3,80,450 in the preceding year. In 1886-87, transactions in connection with the internal trade of Bengal amounted to Rs. 13,000, but in 1887-88 the exports to Northern Bengal from Calcutta were valued at Rs. 11,000 only.

The increase in the aggregate quantity registered during the past year was 6,37,137 maunds, or 18·62 per cent. as compared with the previous year, and 15,20,439 maunds, or 59·87 per cent. as compared with 1885-86. The advance was mainly in the downward traffic, the total quantity being 27·26 per cent. and 68·04 per cent. greater than in the two preceding years, respectively. In the upward trade, the figures exhibited a decrease of 15·91 per cent. on the returns of 1886-87, and an increase of 23·66 per cent. on those of 1885-86. Last year the share of Calcutta was 71·16 per cent. of the downward trade, and 82·57 per cent. of the upward trade.

19. Of the principal articles comprised in the downward traffic, those in which the increase during the past year, as compared with 1886-87, was most marked were jute, (raw) (10,82,602 maunds), gunny-bags (903,830 in number), drugs and chemicals (Rs. 1,05,060), tea, Indian (31,963 maunds), and cotton, (raw), (13,043 maunds), and the staples which showed the largest decrease were hides (number 596,354), skins (number 96,170), rice, husked (13,781 maunds), and mustard (10,475 maunds); on the other hand, the chief fluctuations in the upward traffic were a decrease of Rs. 18,52,669 worth of piece-goods, and 79,092 maunds of salt, against an increase of 88,250 number under gunny-bags, and 3,229 maunds under Indian twist.

20. *Dacca service.*—The quantities carried both ways during the past year were 2,88,753 maunds, or 15·32 per cent. below the figures for 1886-87, and 4,97,172 maunds, or 45·27 per cent. in excess of those for 1885-86. The decrease occurred chiefly in the down traffic, which fell off from 15,47,947 maunds in 1886-87 to 12,93,180 maunds in 1887-88. The abstracts below show the

quantities and values of the principal staples of traffic carried by this service during the past three years:—

25. The aggregate quantity of the registered trade of the past year carried both ways amounted to 75,40,173 maunds, which showed a considerable increase of 22·41 per cent. as compared with the totals of the previous year, and a slight falling off of 1·65 per cent. in comparison with the figures for 1885-86. The advance in the import traffic was 15,49,942 maunds over the returns for

1886-87, but in the export trade, there was a trifling decrease of 1,69,751 maunds. The trade of Calcutta remained the same as in the preceding year. In the Dacca block, the increase shown under imports was 14,52,837 maunds, but the exports showed a decrease of 2,07,651 maunds; the trade of the Northern Bengal block showed an increase of 1,20,220 maunds under imports, and of 87,981 maunds under exports, while the figures of the Eastern Bengal block exhibited a slight fall both under imports and exports. A statement is subjoined to show the chief staples of traffic carried each way during the past three years.

26. In the import traffic, the largest increase, as compared with 1886-87, occurred in lime, oranges, bamboos, linseed, tilseed, and hides, and the largest decrease in paddy, potatoes, mustard seed, and spices; while in the export traffic, the chief staples which showed an increase were European piece-goods, Indian piece-goods, cocoanuts, rice husked, provisions, salt, spices and tobacco; and the articles in which there was a marked decrease were gram and pulse, sugar drained, and sugar undrained. These fluctuations are briefly noticed in the following paragraphs.

27. *Imports from Assam.*—In the case of lime, the figures for the past year showed an increase of 3,13,046 maunds, or 15·44 per cent. as compared with 1886-87. The largest imports were made to the Dacca block, which received 7,11,086 maunds against 2,97,005 maunds in the previous year, the imports to all other blocks showing a decrease. The total imports of raw cotton aggregated 17,184 maunds against 19,470 maunds in the previous year, but the figures are not of much value as, according to the Report on the River-borne trade of the province of Assam for the year 1885-86, "a large quantity of the cotton grown in the Garo hills is shipped from places in Bengal below Dhubri, and thus escapes registration in Assam." Oranges form an important article of export from Sylhet. In the Assam returns, 430 oranges are said to weigh a maund; at this rate, the total quantity of the year's traffic amounted to 1,76,154 maunds against 93,267 maunds in 1886-87. By far the largest increase occurred in the exports to Calcutta (101·90 per cent.) and to the Dacca block, which includes the Chittagong Division (113·38 per cent.) Last year, the imports of paddy fell off from 504,616 maunds in 1886-87 to 3,49,654 maunds in 1887-88. The decrease mainly occurred in the quantities carried to the Dacca block, which received only 3,32,190 maunds against 4,57,101 maunds in the previous year. As regards the import hide trade, Calcutta received 120 pieces against 1,200 pieces consigned from Assam during 1886-87. The shell-lac trade showed a further increase, viz. from 1,480 maunds in 1885-86 and 6,285 maunds in 1886-87 to 9,451 maunds in 1887-88. The trade in potatoes showed a very large decrease of 65,096 maunds The importation into Calcutta amounted to only 34,582 maunds against 78,965 maunds, and to the Dacca block 6,866 maunds against 22,456 maunds in 1886-87. The imports of linseed rose from 29,925 maunds in 1886-87 to 45,680 maunds in 1887-88. The traffic in mustard seed showed a decrease of 35,134 maunds. The imports into Northern Bengal amounted to 1,83,834 maunds against 2,21,113 maunds in 1886-87. Last year a large supply of til seed was sent to Calcutta from Assam, the total quantity amounting to 24,306 maunds against 8,989 maunds in 1886-87. The trade in spices showed a falling off of 7,997 maunds. No exports were made to the Northern and Eastern Bengal blocks, while shipments to the Dacca block fell off from 17,115 maunds to 10,563 maunds. The traffic in bamboos, which is exclusively with the Chittagong Division, showed a considerable increase of 2,435,000 in number.

28. *Exports to Assam.*—The total value of European piece-goods exported to Assam was Rs. 10,17,700 against Rs. 5,62,400 in 1886-87, and Rs. 3,45,400 in 1885-86. The supply exported from the Dacca block rose from Rs. 3,26,485 in 1886-87 to Rs. 3,67,300 in 1887-88. In Indian piece-goods, there was a rise in value of Rs. 59,320 against a similar rise of Rs. 1,68,520 in the previous year, this trade being chiefly with the Dacca block, which supplied Rs. 3,29,720 worth of goods, against Rs. 2,65,000 worth in 1886-87. Under cocoanuts, there was an increase of 36·14 per cent., the exports from the Dacca block showing an increase of 22·19 per cent., those from Eastern Bengal of 31·21 per cent., and those from Northern Bengal of 141·19

per cent. The trade in gram and pulse showed a decrease of 40,732 maunds, the supply sent to Assam from the Dacca block amounting to 1,53,156 maunds only, against 2,03,835 maunds in the preceding year. The total quantity of rice exported from Bengal was 4,63,847 maunds, against 3,59,468 maunds in 1886-87, and 81,710 maunds in 1885-86. The largest supply (2,69,560 maunds, against 2,29,446 maunds) went from the Dacca block; the quantity carried from Eastern Bengal rose from 78,859 maunds to 1,24,090 maunds; and the shipments from Northern Bengal rose from 48,528 maunds in 1886-87 to 62,799 maunds in 1887-88. There was a very considerable increase in the exportation of provisions, of which 82,846 maunds were registered during the past year, against 19,698 maunds in 1886-87; the consignments from the Dacca block increased by 67,085 maunds, as compared with the preceding year. In the export salt trade, the figures exhibit an increase of 30,140 maunds, or 8 56 per cent. The shipments from Calcutta fell off from 2,60,460 maunds to 2,38,256 maunds, but in all other cases the figures showed an increase, namely, 15,174 maunds under the Dacca block, 12,059 maunds under Northern Bengal, and 25,001 maunds under Eastern Bengal. The exports of spices to Assam advanced by 73,518 maunds; the consignments from the Dacca block being 1,86,412 maunds, against 1,03,924 maunds in the previous year. In drained or refined sugar, the shipments from Calcutta fell off from 13,409 maunds to 9,991 maunds, and those from Eastern Bengal, from 18,616 maunds to 8,864 maunds. The decrease of 8,888 maunds under undrained sugar was owing to shorter despatches of the article from Eastern Bengal, which contributed 21,517 maunds less than in 1886-87. The quantity of tobacco shipped for Assam amounted to 1,42,652 maunds, against 1,27,493 maunds in 1886-87. The increase occurred in the consignments from Northern Bengal, which contributed 55,124 maunds against 32,207 maunds in the preceding year.

CHAPTER X.

INLAND TRADE OF CALCUTTA.

The total quantity and value of the merchandise carried to, and from, Calcutta by internal routes during the year 1887-88, as compared with the figures for the two previous years, are as follows:—

The increase last year in the total trade carried both ways was 1·65 per cent on the figures of 1886-87 and 9·08 per cent. on those of 1885-86. The supply carried by country boats, which amounted to 37 69 per cent. of the total trade, was 10·35 per cent. more than in 1886-87. The quantity carried by inland steamers, which represents merely one-eighteenth of the total trade, was 3·54 per cent. less than in 1886 87; but 9·72 per cent. in excess of the figures of 1885-86. Of the gross traffic of the year, 50·51 per cent. was attracted to the railways, namely, 38·71 per cent. to the East Indian line, and 11·80 per cent. to the Eastern Bengal line. The supply consigned by the former line was 6·59 per cent. below the total of 1886-87, while on the latter line the figures exhibited an advance of 8·82 per cent. The road traffic formed 6·34 per cent. of the entire trade, and was nearly one per cent. more than the figures for 1886-87.

Transactions in the three staples specified above represent 45·63 per cent. of the entire exports from Calcutta during the year under report.

3. As regards values, no comparison can be made between the figures of 1887-88 and those of the two previous years, in consequence of the change in the system of valuation as explained in paragraph 7, chapter I of this report.

4. The circumstances affecting the trade of Calcutta during the past year may be thus enumerated and described—

Causes, external to the Lower Provinces, which affected the trade of the year.

(1). Calcutta draws her supplies of cotton from the North-Western Provinces and the Punjab. The rainfall was not favourable to the cotton crop last year in either of these places, and this led to supplies being held back and exports from Calcutta diminished. Last year's American cotton crop was slightly below that of the previous year. In the English market, East Indian cotton is not esteemed as highly as American or Egyptian cotton, but better prices were obtained for it in 1887 than in 1886, the improvement being due to the operations of speculators in American cotton diverting the attention of manufacturers to India.

(2). Higher prices were obtained for indigo in Calcutta in consequence of stocks in London having been reduced by increased consumption in Europe and America. In the Continent of Europe, indigo holds its own against all rival chemical preparations.

(3). Larger shipments of gram were made to the Mauritius, Ceylon, and the Straits, and the exports to Burma were also on an extensive scale. Although there was an ample supply of gram in the market during the past year, the demand was sufficient to raise prices.

(4). Ceylon, which depends principally upon Calcutta for rice, drew 59·02 per cent. more than in the previous year. The demand for rice in the English market was not exceptionally strong, the increased shipments being due in a great measure to ship-owners buying rice themselves for a return cargo, rather than accept unremunerative rates of freight. The effect of this was to overstock the market, and, had not supplies from Saigon and Siam been drawn off by the China demand, the fall in price, consequent on the over-supply, would have caused severe losses. Formerly rice was milled in England for export, but now there are rice mills established in several places on the Continent, and the demand for rice has thus been greatly increased.

(5). There was a short crop in the wheat-producing districts in the Upper Provinces in consequence of insufficient rain and blight. Prices were throughout the year very irregular, and the supply ran so short and the margin of export was so curtailed, that many native dealers had to buy back their contracts at a loss at current market rates to avoid the certainty of much heavier losses later on. The wheat crop in Russia and a part of the United States was a very full one, so that the short yield in India had no effect on prices.

(6). The demand for hides in the Calcutta market was throughout the year under report keener than the condition of the leather trade in Europe would seem to have warranted. This was brought about by speculative purchases made on account of possible requirements for military purposes. Prices were depressed by the heavy competition in the United Kingdom of American tanned leather.

(7). In the United Kingdom, the consumption of jute has increased, but considerable quantities were exported thence to the Continent, which competes more largely every year with Dundee in jute manufactures. On the other hand, the fall

in the exports of gunnies to the United Kingdom is said to have been due to the activity of Dundee, which has worked hard to keep India as much as possible out of the English market.

(8). Natural saltpetre, which is found only in India, is now competed with in Europe by artificial saltpetre, which is obtained by a process of mixing nitrate of soda with chloride of potash.

(9). Larger quantities of linseed were shipped for the United States. The prices of this article were in sympathy with the English market, and very low throughout the year, the competition of Russian and South American linseed having caused a considerable fall.

(10). In the United Kingdom, mustard seed seems to have lost much of its importance owing to short receipts from India, the demand on the Continent of Europe having absorbed most of the available supplies.

(11). A good business was done in Indian silk in the London market, where all offered for sale was readily bought. The improvement was due to two causes, viz., telegraphic information from China late in the season of damage to, and a probable short outturn from, the second China crop; and secondly, to the anticipation of a late and inferior Italian crop owing to inclement weather.

(12). As in previous years, large imports of cane sugar from Mauritius and of beet sugar from the United Kingdom and Austria were received during 1887-88, and it is feared that no abolition of sugar bounties will bring the export trade of Calcutta back to its old position.

(13). The shipments of Indian tea to the United Kingdom were stimulated owing to a falling off in China tea, whence, owing to a short crop, the exports of congoes diminished by 30 million lbs.

Causes, internal to the Lower Provinces, which affected the trade of the year.

(1). The indigo crop in Bengal and Behar was much the same as in the previous year.

(2). The rice harvest in these provinces was above the average.

(3). The wheat crop fell short of the average.

(4). The outturn of pulses was very good in Bengal, but below the average in Behar.

(5). The jute crop was better by 10 per cent. than in the previous year, and prices were kept up by the improved local demand for the Calcutta mills.

(6). The Calcutta jute-mills carried on a thriving trade in gunnies during the past year.

(7). The linseed crop was good in both Bengal and Behar.

(8). The outturn of mustard seed was on the whole below the average, and there was not much demand for export by sea.

(9). In the Calcutta market the past year's trade was characterised by a scantiness of supplies and a difficulty in obtaining saltpetre at rates enabling it to compete successfully in Europe with the artificial production. A check has been given to the manufacture of this article by the operations of the Salt Department, which insists on all salt extracted in the process of manufacture being either destroyed or taxed.

(10). There was an extension of sugarcane cultivation in these provinces.

(11). The outturn of Indian tea was good. A satisfactory feature of the trade during the past year was the greater rapidity with which the produce was brought down and disposed of, owing to improved communications.

(12). The tobacco crop was good in Behar and in Northern Bengal. In Tirhoot, however, the yield is said to have been below the average.

(13). The increase of duty on salt at the close of the year to Rs. 2-8 per maund, the terms of section 37 of the Sea Customs Act, and the fact that a large quantity of the available salt had already been bought on speculation by a large dealer, combined to run up the price of salt to a quite unusual height.

(14). The consumption of European cotton piece-goods was much the same as in the previous year. There was a falling off in the imports of these goods by sea during the past year owing to heavy importations in 1886-87.

5. Besides the causes mentioned above, there were the low rates of exchange and the low rates of freight, both of which operated on the Calcutta trade.

COTTON, RAW.

6. The cotton trade of Calcutta during the past year, as compared with that of the two previous years, was as follows :—

The rainfall was not favourable to the cotton crop last year in the Upper Provinces, and this led to supplies being held back, and the diminution of the exports from Calcutta by sea. The Collector of Customs, however, observes that "the total Indian exports have been greater, more having gone from Bombay, Madras, and Burma."

7. It will be seen that the decrease last year in the import trade amounted to as much as 24·29 per cent. in comparison with 1886-87, but when compared with 1885-86, the figures exhibit an increase of 20·01 per cent. While the traffic along the East Indian Railway fell off by 33·77 per cent. as compared with 1886-87, the sea-borne imports remained practically unchanged, the fluctuation being only 5·09 per cent. below the figures of 1885-86. The following statement shows the different provinces from which raw cotton was imported into Calcutta during the past three years :—

The greatest falling off occurred in the imports received from the North-Western Provinces and Oudh, where the cotton crop was a poor one, and the largest increase was in the supplies from Bengal, where the outturn was plentiful. The districts in the North-Western Provinces and Oudh, which despatched

smaller quantities last year, were Agra (2,33,213 maunds), Bullandshahr (95,529 maunds), and Etawah (60,678 maunds). The Bengal districts which contributed to the increase were Dacca (24,899 maunds), Chittagong (19,444 maunds), and the 24-Pergunnahs (9,113 maunds). "In the Chittagong Hill Tracts the yield of cotton was the best that has been obtained for many years."

Principal Railway Stations.

8. The quantities carried by rail during the past three years were for the most part booked from the following stations:—

The steamer service of the Eastern Bengal State Railway carried 25,748 maunds of raw cotton to Calcutta from Naraingunge, against 9,704 maunds in 1886-87.

Imports by sea.

9. The sea imports during the past year were principally received from Bombay (1,49,285 maunds against 1,53,608 maunds), Burmah (8,514 maunds against 11,982 maunds), Chittagong (17,797 maunds against 5,597 maunds), and from Madras (17,366 maunds against 22,292 maunds).

Exports.

10. The decrease in the export trade during the past year was 20·59 per cent. on the figures for 1886-87. Compared, however, with the transactions of 1885-86, the past year's trade showed an advance of 42·41 per cent. The destination of the sea-borne trade was as follows:—

The Customs report for the year 1887-88 contains the following remarks on the fluctuations noticed in the foregoing statement:—

"About a fifth of the Indian cotton exported to foreign countries goes from Calcutta. The United Kingdom, Austria, Belgium and France have taken less from Calcutta; while Italy, Germany and China have taken more than in 1886-87.

"In the English market, East India cotton is not esteemed so highly as American or Egyptian, but better prices were obtained for it in 1887 than in 1886, the improvement being due to the operations of speculators in American cotton, which turned the attention of manufacturers to India

"Last year's American cotton crop was slightly under that of the previous year, the figures for the past two seasons having been 6,550,000 and 6,514,000 bales respectively. The United Kingdom imported 2,767,380 bales, averaging 446 lbs. each of last year's American crop, and about a fifth of this quantity of East Indian cotton. A great deal of the East Indian cotton, however, eventually goes to Europe, and England consumes ten times more American than East Indian cotton. Of the quantity consumed in the United Kingdom by far the largest part is American, then comes Egyptian, then East Indian, and lastly, running East Indian close, Brazilian."

Quantity not exported before the close of the year.

11. The imports balanced the exports with a surplus amounting to 3,05,499 maunds, against a surplus of 4,57,020 maunds in 1886-87, and of 3,68,704 maunds in 1885-86.

Imports.

European twist and yarn.

13. The increase in the import trade amounted to 5·13 per cent. on the returns of 1886-87, and to 10·0 per cent. on those of 1885-86. The figures relating to the imports by sea represent the total clearances for consumption from boardship and from bond. The chief sources from which the supply of European twist and yarn were derived during the past three years, were as follows:—

14. The Collector of Customs, Calcutta, writes:—

"The figures of the total imports of twist and yarn, including grey and white and colored, show an increase in both quantity and value over last year; for though in 40s, which comprise more than half the imports of grey and white twist, there was a slight falling off, there was an increase in some of the other counts—more especially in numbers higher than 40s. The trade in these goods during the year has been satisfactory to importers and

dealers; prices remained at a remunerative level, and notwithstanding the increase in the imports, stocks at the close of 1887 were considerably lower than for the corresponding period of 1886. The year's trade shows that the position of foreign imported twist and yarn has been well maintained in the market notwithstanding the keen competition of the Indian-made article. The prosperity of the Indian weaving mills has no doubt contributed to this."

Indian twist and yarn.

15. There has been very little change during the past three years in the aggregate quantity of the imports of twist and yarn manufactured in this country. The imports by sea were chiefly from Bombay, and the Collector of Customs, Calcutta, remarks, regarding the increase in the trade of that port with Calcutta, that "it is noticeable how the supplies of grey and white twist from India are going up: for the three previous years the English and Indian supplies were about equal, but for the past year we have received 7,093,835 lbs. only from England, against 8,411,420 lbs. from India."

16. The supplies imported by country boats comprised for the most part the produce of the cotton mills in the neighbourhood of Calcutta. The figures for the past three years have remained almost the same, and the following are the different marts which contributed to the trade :—

17. The following information regarding the working of the cotton mills in the Presidency Division has been extracted from the Annual General Administration Report of that Division for the year 1887-88 :—

"From the returns received from the owners or managers of the four cotton mills, it appears that 7,685 tons of cotton were worked up during the year, as compared with 8,330 tons in the preceding year. The approximate value of the outturn is given at about 56 lakhs of rupees, showing an increase of four lakhs in value in spite of the decrease of 645 tons in weight. The year was one of much prosperity in the cotton trade, cotton being plentiful and cheap, and the consumption of yarn steady and full. A feature in the season is said to have been the large increase in the export of the Calcutta mills' yarn to China, the local market in consequence being considerably strengthened."

In the Burdwan Division "cotton manufactures are said to have shown some signs of revival during the year, although the mills continued to work a short time." The supply of twist and yarn imported by the Eastern Bengal State Railway showed a decrease of 10,199 maunds on the returns of 1886-87, and of 2,698 maunds on those of 1885-85. The bulk of the imports were derived from Shamnugur, where the Dunbar Cotton Mill is situated.

18. The fluctuations in the imports by road were very slight. The supply brought by this route comprises part of the outturn of the mills in and around Calcutta.

19. The total exports of these goods of European manufacture from Calcutta during the past year, showed little or no change as compared with 1886-87 and 1885-86. The destination of this traffic was to the following places :—

In spite of the importation of cheap European piece-goods, cotton cloths are still woven by local weavers in Midnapore, and Government is informed that "as a rule they know no other work and cling to their ancestral business to obtain a precarious means of living. This industry is, however, on the wane, as the weavers cannot compete with Manchester in the production of cheap goods." The other districts which imported large quantities of twist and yarn were Nuddea, (21,390 maunds against 19,296 maunds), Dacca (16,968 maunds against 18,973 maunds), Furreedpore (17,153 maunds against 12,282 maunds), Hooghly (8,994 maunds against 9,234 maunds), and Jessore (7,348 maunds against 8,542 maunds).

The steamer services of the Railway Companies supplied Dacca with 13,466 maunds of twist during the year, against 13,791 maunds in the preceding year. The other marts which imported largely were Serajgunge (903 maunds against 3,863 maunds), and Naraingunge (1,295 maunds against 1,891 maunds).

Indian twist and yarn.

23. The bulk of the exports of Indian twist and yarn by the East Indian Railway during the past three years, was consigned to the following stations :—

The noticeable increase in the exports to foreign ports was due to large quantities having been shipped for China and Japan.

Comparison of imports with exports.

25. The total quantity of twist and yarn imported into Calcutta was 57,800 maunds below that exported during the year, against a similar deficit of 28,361 maunds in 1886-87, and of 25,956 maunds in 1885-86.

The values given in the foregoing statement are declared values in all cases, save as regards goods carried by railway and by inland steamers, in which cases they are registered by weight only. In the case of imports by rail, the value of these goods has been calculated according to the value rates of the different exporting provinces. In all other cases values have been calculated at Rs. 63 per maund, which has been taken to represent the average value of a maund of European piece-goods of all sorts in Bengal.

EUROPEAN PIECE-GOODS.

Imports.

27. The aggregate value of foreign piece-goods cleared for consumption from ship-board and from bond during the past year, was below the figures of 1886-87 by 6·27 per cent., but over those of 1885-86 by 15·94 per cent.

The following table gives an abstract of the imports from each port separately during the past three years:—

28. Compared with 1886-87, the imports from the United Kingdom showed a falling off of 6·37 per cent. On this subject the Collector of Customs, Calcutta, makes these remarks:—

"The importations of cotton goods show a fall in value in comparison with the previous year, amounting to over 72½ lakhs, the decline being in grey, white, and colored cotton piece-goods. This is the natural result of the heavy importations of the previous year.

"The falling off in grey and white piece-goods has followed naturally on the heavy importations of 1886-87, nor are they below the average of ordinary years. The trade in these goods has been fairly satisfactory during the year.

"The trade in colored, printed and dyed goods has not been satisfactory; the stocks accumulated from the heavy importations of the previous year had to be disposed of at unremunerative prices, and the distributing markets for these goods up-country appear to have been throughout the year in a dull condition.

"The participation of native houses of business in the direct trade with Manchester still continues, and has a tendency to increase. In Manchester the cotton spinners have had to contend with certain confederacies, which at New York and Liverpool have been buying up all the available supply of raw cotton in order to force up the price. They have met this manœuvre by steady trading, purchasing only the amounts required for immediate business, and by drawing supplies from Egypt and India, but their trade has no doubt been less satisfactory in consequence of it."

Exports.

29. The total export trade showed a decrease of 1·77 per cent. as compared with 1886-87, and an increase of 8·19 per cent. as compared with 1885-86. The largest decrease occurred in the quantities exported by rail. In the case of the East Indian Railway, the figures fell off by 7·82 per cent. in comparison with the previous year, while the Eastern Bengal State Railway showed an increase of 16·35 per cent. The following statement shows in detail the different provinces to which piece-goods were exported from Calcutta, during the past three years:—

		Exports from Calcutta.

30. With an addition of 25 per cent. to the imports by sea on account of under statement of values, insurance, landing charges, &c., &c., the total value of the past year's traffic would amount to Rs. 15,65,69,027. Of this amount, the value of piece-goods exported during the year was Rs. 13,97,97,154 as shown above. The value of the surplus of imports over exports therefore amounted to Rs. 1,67,71,873, against Rs. 2,47,58,109 worth in 1886-87, and Rs. 58,85,540 worth in 1885-86. These figures show a considerable reduction of stocks in Calcutta on the 1st April, 1888.

Comparison of imports with exports.

31. The estimated values of piece-goods exported to the different divisions of Bengal Proper from Calcutta during the past three years, were as follows:—

TRADE OF BENGAL PROPER.

Imports.

To	1885-86.	1886-87.	1887-88.
	Rs.	Rs.	Rs.

Total ...	4,17,61,233	4,88,92,538	5,33,12,454

In addition to the above supply, the imports into Bengal Proper by rail, and into Chittagong from foreign and Indian ports other than Calcutta, were:—

	1885-86.	1886-87.	1887-88.
	Rs.	Rs.	Rs.
Imports into Bengal by rail	4,284	6,489	17,675
Imports into Chittagong from foreign and Indian ports other than Calcutta ...	5,268	7,354	14,920
Total ...	9,552	13 843	32,595

The aggregate total value of the imports, therefore, amounted to Rs. 5,33,45,049, against Rs. 4,89,06,381 in 1886-87, and Rs. 4,17,70,785 in 1885-86.

Exports.

The total value of piece-goods exported from Bengal Proper by rail and by road during the past three years, was as follows:—

	1885-86.	1886-87.	1887-88.
	Rs.	Rs.	Rs.
To Behar (by rail)	11,529	21,357	16,380

Total ...	4,97,259	4,09,791	5,38,350

32. If exports are deducted from imports, the value of piece-goods left for consumption in Bengal is Rs. 5,28,06,699 during the past year. This, among a population of 40,419,594 souls, would give an average rate of Rs. 1-4-11 per head, against Re. 1-3-2 in 1886-87, and Re. 1-0-4 in 1885-86.

Comparison of imports with exports.

33. **The amount of piece-goods despatched from Calcutta to the Behar Province, division by division, during the past three years, was as follows:—**

TRADE OF BEHAR.

" Bombay	61,740	72,891	29,176
Total ..	1,42,191	1,84,086	92,220

The total registered imports into Behar, therefore, amounted to Rs. 3,61,51,515 against Rs. 3,80,44,491 in 1886-87, and Rs. 3,34,90,101 in 1885-86.

34. The value of piece-goods exported from Behar by rail and by road during the past three years, was as follows:—

35. The surplus of imports over exports amounted to Rs. 3,44,62,543, which gives an average yearly local consumption of Re. 1-7-10 per head of a population of 23,127,104 souls, against Re. 1-9-3 in 1886-87, and Re. 1-6-3 in 1885-86.

Comparison of imports with exports.

36 The importation of piece-goods into the Orissa Division during the past three years, was as follows:—

Trade of Orissa.

		1885-86.	1886-87.	1887-88.
		Rs.	Rs.	Rs.

37. The quantity exported from the province during the past year is valued at Rs. 9,350, and the balance amounting to Rs. 17,16,924 would give

a rate of five annas and three pies per head on a population of 5,199,877 souls. In 1886-87, the rate per head was four annas and one pie, and in 1885-86, five annas and six pies.

Trade of Calcutta with Assam.

38 The total value of piece-goods imported into Assam from Calcutta was Rs. 33,60,522, against Rs. 44,30,245 in 1886-87, and Rs. 52,88,525 in 1885-86.

41. The Collector of Customs, Calcutta, makes the following remarks under this head:—

"The imports of grey cotton piece-goods have declined by nearly 59¾ million yards, though the decline in value amounts to only about 1¾ lakhs, or ·2 per cent. With white cotton piece-goods it has been much the same. A heavy decline in quantity of 35 million yards is accompanied by a fall in value of only about 11 lakhs, or 4·8 per cent., as compared with the previous year.

"The heaviest decline has been in colored, printed and dyed goods, the imports of which are 6½ million yards less than in the previous year, with a decline in value of 70¾ lakhs, or 28·8 per cent.

"In other descriptions of cotton goods, which includes sewing thread, there has been an increase of 21 per cent."

42. The following statement shows the proportion in which it has been estimated by the district officers that the different classes of European piece-goods were imported into some of the Bengal districts, during the year under report:—

Progress of local manufacture by steam and by hand.

47. There are six cotton mills in Bengal, which manufacture yarn, but in none of them were piece-goods manufactured during the year. The following extracts regarding the hand-weaving industry in the Lower Provinces are taken from the general Administration Reports of the Commissioners of Divisions for the year 1887-88:—

Burdwan Division.—"In spite of the importation of cheap European piece-goods, cotton is still woven by local weavers in every district. As a rule, they know no other work, and cling to their ancestral business to obtain a precarious means of living. This industry is, however, on the wane, as the weavers cannot compete with Manchester in the production of cheap goods. In Burdwan a revival in this industry has been noticed in the last two years; but generally, although those who can afford them prefer the country cloths, which are of a better texture and more durable, the cheapness of Manchester goods drives the local manufacture out of the market."

Rajshahye Division.—"Good country cloth is manufactured at Pubna and its neighbourhood. A pair of *dhuties* fetch as much as Rs. 18 to Rs. 24. The Dogachi *dhuties* are specially valued. These cloths are extensively exported to the different districts of Bengal.

Urni-chudders, of a very fine texture and much appreciated by the richer classes, are made at Chotadhul, a village near Serajgunge."

Bhagulpore Division.—Coarse cloth is manufactured in Monghyr. Nothing particular has been said regarding this industry in the Collector's report this year. In Bhagulpore the cotton-weavers are badly off, and every year more of them take to agriculture. Coarse coloured cloths are manufactured for local consumption in Purneah. In the Sonthal Pergunnahs the Momins (Jolhas) weave a stout cloth, which is coarse, but stronger than the imported piece-goods. It is worn largely, but is said to be yielding before the piece-goods."

INDIGO.

48. The total weight of the Calcutta trade in indigo during the past year, as compared with the figures of the two preceding years, was as follows :—

Specification of routes.	Imports.			Exports.

Total ...	1,04,030	1,25,671	1,30,939	1,04,749	1,20,334	1,19,786

The increase in the imports noticed in the last report was fully maintained, and still further extended during the year 1887-88. According to the Customs return the price of indigo averaged Rs. 231 per maund, against Rs. 219 per maund in the previous year. It is stated that higher prices were obtained in Calcutta in consequence of stocks in London having been reduced by increased consumption in Europe and America.

Imports.

49. The import trade rose by 4·19 per cent. and 25·87 per cent. on the returns of 1886-87 and 1885-86, respectively. The supplies attracted to the Eastern Bengal State Railway showed an advance of 30 01 per cent. as compared with the previous year. The different provinces which contributed to the trade were as follows :—

	1885-86.	1886-87.	1887-88.
	Mds.	Mds.	Mds.
Behar	59,481	73,798	71,457

Other places	546	808	2,296
Total ...	1,04,030	1,25,671	1,30,939

With regard to the North-West, the cultivation was considerably more than last year, but the produce is said to have been very poor. As regards Bengal, the only districts where the outturn is shown to have been appreciably more than in the preceding year were Jessore and Rajshahye. In Jessore the quantity manufactured was 2,762 maunds, against 1,339 maunds in the previous year. The price varied from Rs. 190 to Rs. 222 per maund, while in the previous year it varied from Rs. 190 to Rs. 207. The outturn in the Rajshahye district amounted to 1,165 maunds, against 848 maunds in 1886-87.

The indigo industry is said to be increasing and doing very well in the Patna Division; but in the Bhagulpore Division the season's crop suffered to a certain extent by the bad distribution of rain.

Exports.

50. In the export trade there was very little change in comparison with the figures of 1886-87. The total exportation by sea during the past three years is shown below:—

The Collector of Customs, Calcutta, makes the following remarks on the condition of this trade during the past official year:—

"In the London market last year prices ruled lower than in the previous one, but some improvement is expected in the coming year, for considerable quantities of indigo went into consumption, especially on the continent of Europe, where indigo holds its own against all rival chemical preparations.

It will be observed that the greater part of the crop went to the continent of Europe, the increase being most conspicuous to France, Austria, and Germany, the shipments for the past three years to Germany standing at—

Cwt	3,196	4,596	6,380
Value Rs.	11,45,362	13,77,802	20,21,591

Russia also took 1,623 cwt., value Rs. 5,03,924, in 1887-88, against 416 cwt., value Rs. 1,21,507, in the previous year. This increase in the direct trade with Russia was no doubt connected with the commencement of despatches from Russia of petroleum."

51. Last year the quantity of indigo not exported before the close of the year was 11,153 maunds, against 5,337 maunds in 1886-87; in 1885-86, however, there was a deficit of 719 maunds in the imports as compared with the exports.

52. The gross import and export traffic of Calcutta in raw jute during the past three years, was as follows:—

53. The total increase in the import trade was 18·05 per cent. as compared with 1886-87, and 17·88 per cent. as compared with 1885-86. The largest increase occurred in the quantities carried by the Eastern Bengal State Railway, the figures showing an advance of 28·05 per cent. on those of the previous year. The boat traffic rose by 9 60 per cent., while the traffic attracted to the inland steamers exhibited an advance of 6·12 per cent., and that carried by road routes, an increase of 3·34 per cent. The Customs report for 1887-88 shows that the crop was a better one by 10 per cent. than in the previous year, and that prices were kept up by the improved local demand for the Calcutta mills.

Imports.

54. The outturn of jute in Northern Bengal was short owing to either unseasonable or excessive rainfall, but there was a large crop in the Dacca Division, and the Commissioner makes these remarks regarding the jute trade of the Mymensing district:—

"The yield of jute was not only more copious, but better in quality than in the previous year, owing to the absence of any flood, which deteriorated its quality in the previous year There was also a greater demand for jute in the Calcutta houses. Hence, not only was a greater quantity sold, but it fetched a larger price. In the previous year the average price was Rs. 3 a maund: this year it was Rs. 3-6 a maund. The total quantity exported this year is said to have been 16,02,111 maunds, value Rs 54,07,124. Only in the sub-division of Jamalpore the condition of the jute trade was not satisfactory, and it was probably owing, as the Sub-divisional Officer suggests, to difficult communication."

The outturn in the Presidency Division was generally above the average, and was particularly favourable in the sudder and Diamond Harbour sub-divisions of the 24-Pergunnahs district.

55. In the following statement the total imports of jute into Calcutta from the principal supplying districts are arranged according to the volume of the trade, and compared with the quantities despatched by rail:—

Concerning the exports to foreign ports, the Collector of Customs, Calcutta writes:—

"The exports of jute have advanced 17·4 per cent., and the figures are the highest in the table. All the countries have taken more, especially the United Kingdom and the United States, but the 1,626,068 cwt., valued at Rs. 63,99,116, sent to the latter country, comprise jute-cuttings and rejections used for paper making.

"In the United Kingdom the consumption of jute has increased, but considerable quantities have been exported from there to the continent of Europe, which competes more largely every year with Dundee in jute manufactures"

Quantity not exported before the close of the year.

62. After deduction of the total exports from the total quantity imported into Calcutta, there remained a surplus of 30,05,194 maunds, against 23,77,718 maunds, in 1886-87, and 26,49,358 maunds in 1885-86.

Imports

64. As regards the imports, the result of the last year's traffic showed an increase of 13·09 per cent. as compared with 1886-87, and of 29·32 per cent. as compared with 1885-86. The advance was most marked in the supplies carried by boat (16·19 per cent.) and by the Eastern Bengal State Railway (6·64 per cent.

The imports by sea rose from 101,955 bags in 1886-87 to 943,411 bags in 1887-88. This was due chiefly to larger shipments from foreign ports (520,206 bags) and from Bombay (324,700 bags).

66. The Customs report of the past year shows that the Calcutta jute mills carried on a satisfactory business. In the Rajshahye Division also good business was done in connection with the manufacture of gunnies. The Commissioner of the Division writes:—

"Gunny-cloth is manufactured on an extensive scale in Dinagepore, and gunny-bags are manufactured more or less in every district of the Division. The Serajgunge jute mill gives employment to about 4,000 coolies, the majority of whom are inhabitants of Behar and the Upper Provinces. The outturn was about 8,000 tons, as compared with 9,200 tons in the previous year. There is a jute press in connection with the manufactory, and the bulk of the manufacture is sent to Calcutta. Two jute hand-presses were set up in Julpigoree during the year."

The total supply brought to Calcutta from Serajgunge by the steamer service of the Eastern Bengal State Railway was 6,882,855 bags against 6,974,240 bags in 1886-87, and 6,060,740 bags in 1885-86.

69. The number of bags exported during the year was 9·66 per cent. above the trade of 1886-87, and 7·82 per cent. in excess of that of 1885-86. The bulk of this trade was sea-borne, and the subjoined statement has been prepared to indicate its destination.

Regarding this trade, the Collector of Customs, Calcutta, writes :—

"The shipments to the United Kingdom, Egypt, the United States, and Hong-Kong have been smaller, but those to Australia and the Straits Settlements have doubled.

"The fall in exports to the United Kingdom has no doubt been due to the activity of Dundee, which has worked hard to keep India as much as possible out of the English market.

"The United States have taken less gunny-bags, but more gunny-cloth, direct from Calcutta No doubt, however, considerable quantities of the gunny-bags which have gone to Hong-Kong and the Straits Settlements have been intended for transhipment to the United States.

"The demand for Australia has been exceptionally good, not alone in woolpacks, but also in cornsacks. Last year the wheat crop in Australia was sufficiently large to require very heavy exports, and the wool clip was also the largest since 1872 To the Cape of Good Hope shipments have advanced from 1,058,037 pieces in 1886-87 to 1,627,071 in 1887-88. This increase is due to the Cape wool clip having also been larger in the past year.

"The improvement shown in the coasting trade is due to larger exports of grain and oilseeds"

70. As regards exports by internal routes, the stations on the East Indian line, which imported most largely, were Patna, 2,389,135 bags, Cawnpore, 1,716,015 bags, Delhi, 1,464,400 bags, Sonthal Pergunnahs, 984,620 bags, Bhagulpore, 868,070 bags, Durbhunga, 756,560 bags, Monghyr, 667,835 bags, Shahabad, 429,065 bags, and Chumparun, 352,170 bags.

Comparison of imports with exports.

71. The number of bags exported by all routes during the past year was 110,353,813 in excess of the number imported there having been also in 1886-87 an excess of 101,370,823 bags, and in 1885-86 of 106,458,423 bags. This represents part of the outturn of the mills in Calcutta and its suburbs.

GUNNY CLOTH.

72. The quantities of gunny cloth sent to, and from, Calcutta by internal routes during the past three years, were as follows :—

It has been explained in previous reports that gunny bags and gunny cloth are shown together in the railway returns. Moreover, in the case of the trade by road and river, this article is registered in pieces, while in the sea-borne trade returns, it is shown in yards. For the purpose of converting pieces into yards, a machine-made piece is taken as equal to 80 yards, and a hand-made piece to 22 yards. The foregoing figures, therefore, do not represent the actual extent of the transactions in Calcutta under this head, part of the trade in gunny cloth having been included under the next preceding head "Gunny bags."

73. The total quantity of the sea-borne trade of Calcutta in this article during the past three years, was as follows:—

	1885-86.	1886-87.	1887-88.

Imports	10,731	......	30,860
Exports	25,267,418	18,480,001	19,134,049

74. The imports by internal routes fell off by 14·69 per cent. as compared with those of 1886-87, but they were slightly in excess of the figures for 1885-86. The quantity carried by road routes exhibited the largest decrease as compared with the two previous years. The following statement shows the different localities from which gunny cloth was most largely sent to Calcutta during those years:—

75. **As regards sea-borne exports, the figures showed a slight recovery from the falling off during 1886-87, but they were still below the trade of 1885-86 by 24·27 per cent. The destination of the exports from Calcutta is noted below:—**

76. The result of the past year's transactions was a deficit in imports over exports by 18,001,485 yards against a similar deficit of 16,978,481 yards in 1886-87, and of 24,188,511 yards in 1885-86. These quantities represent part of the outturn of the steam mills in Calcutta and its suburbs.

Comparison of imports with exports.

77. Besides the registered supplies detailed above, the traffic returns of the Nuddea rivers also show a large quantity of power-loom gunny cloth, amounting to 505,689 pieces, sent up-country direct from the jute mills without passing the Port Commissioners' wharves. The destination of these exports, as compared with the figures of the two preceding years, was as follows:—

78. The number of jute mills worked by steam in the vicinity of Calcutta during the past year was 22, against 21 in 1886-87, and 18 in 1885-86. The quantity of jute worked up in 1887-88 was 44,29,382 maunds, against 36,21,578 maunds and 37,68,892 maunds in the two years 1886-87 and 1885-86, respectively. Separate figures to show the quantity of the raw material used in the manufacture of gunny bags and gunny cloth are not given in the returns. The following statement shows the number of looms and spindles at work, and the quantity of raw jute consumed in the different mills in the districts of Hooghly, Howrah, and the 24-Pergunnahs, during the past year as compared with the totals of the two preceding years:—

FOOD-GRAINS.

79. As in 1886-87, so in the year under report, there was a plentiful harvest, and an active demand for food-grains both in and out of India gave a great impetus to the trade under this head. The import trade showed a slight falling off of ·50 per cent. on the figures for the previous year, but the aggregate increase in the export trade amounted to 4·79 per cent. The following statement shows the total trade, import and export, under each class of food-grains separately during the past year, as compared with the figures for the two preceding years:—

83. The decrease shown above was mainly due to a deficient wheat harvest in the Upper Provinces and in Behar. The Collector of Customs, Calcutta, writes as follows:—

"The United Kingdom, Italy, and France have again been our best customers, but they have all taken less than in 1886-87. The reason for this is not that the trade has been diverted to other ports in India, for there has been a similar fall in the exports of wheat at these: it has been due to a short crop in the wheat-producing districts resulting from insufficient rain and blight. Prices were throughout the year very irregular, and the supply ran so short and the margin for export was so curtailed that many native dealers had to buy back their contracts at a loss at current market rates to avoid the certainty of much heavier losses later on if the contracts stood."

84. Last year the imports showed a large decrease of 33·97 per cent. as compared with the figures of 1886-87, but a slight increase of 1·05 per cent. when compared with 1885-86. The supply carried by rail, which amounted to 79·31 per cent. of the total trade, was 37·13 per cent. less than in 1886-87. In the case of the East Indian Railway, the decrease amounted to 38·27 per cent., while in that of the Eastern Bengal State Railway there was an advance of 25·84 per cent., the boat traffic exhibited a decrease of 6·98 per cent., and the quantities carried by inland steamers fell off from 4,20,536 maunds in 1886-87 to 1,94,360 maunds in 1887-88. The different provinces from which wheat was consigned to Calcutta during the past three years, are shown below:—

Total ...	8,34,906	48,27,411	42,57,083

The only fluctuations which need explanation are the decrease shown against the Patna district and the increase against the Durbhunga district.

The falling off in the former is easily accounted for. Very little wheat is grown in that district, and a considerable quantity is imported by river from the North-Western Provinces for export chiefly to Calcutta. It was stated in paragraph 92 of the report for 1886-87 that the Patna district imported about 10 lakhs of maunds that year from districts in the North-Western Provinces and North Behar, "nearly the whole of which was exported to Calcutta." In 1887-88 the wheat harvest up-country and in North Behar was deficient, and consequently the Patna district drew a smaller supply for despatch to Calcutta. The improvement in the consignments from the Durbhunga district is said to have been due to a good wheat harvest in Nepal, from which State large quantities of food-grains are imported into the frontier districts.

87. The details for Bengal for the past three years, are as follow:—

	1885-86.	1886-87.	1887-88.
	Mds.	Mds.	Mds.
Nuddea	2,23,064	5,91,082	4,84,416

Other districts	59,548	2,15,156	1,76,610
Total ...	3,74,998	12,17,415	9,80,618

The largest decline was in the supplies received from the Nuddea district' where the outturn of the cold weather crops was inferior in quantity to that of the two previous years, but in quality the produce more than made up for the loss. The Collector states that the wheat crop "was particularly fine in the west of the district." As regards the Hooghly district, the remarks regarding the cause of the falling off in the exports from the Patna district, apply. The decrease in the supply sent from the Moorshedabad district was the result of a poor crop consequent on a deficiency of cold weather rain.

Regarding this trade with foreign ports, the Collector of Customs, Calcutta, writes :—

"There has been a fall of 38·4 in the exports of wheat in comparison with the previous year.

"The decrease in 1887 shown against the British East Indies has been made up from most of the other principal sources of supply, chiefly from Russia and the United States on the Atlantic, the only important area like India from which a smaller quantity was taken being the United States on the Pacific.

"The wheat crop in Russia and a part of the United States was a very full one, so that the short yield in India had no effect on prices. I had to report for 1884-85 the average price of wheat in England as 35*s*. 8*d*. per quarter, a price which had not been touched since 1780, but the average price for the past year was 32*s*. 7*d*. per quarter. This has, of course, tended to further decrease the area on which wheat is grown in the United Kingdom.

"The exports of wheat flour from the whole of India to foreign ports show a slight increase, and stand at 36,082,348 lbs. for the past year. There is besides a large export trade from the west to other ports in India. Calcutta took 413,747 lbs. last year from Bombay.

"At present only a small quantity of milled flour is exported from Calcutta chiefly to Mauritius and the Straits; this flour is not sieved like Bombay flour which is imported here more for use among Europeans.

"There would seem to be an opening for a flour-milling industry according to the English method in Calcutta. Milled flour goes largely to Australia from California, and it would seem that Calcutta might compete in this trade and in the trade to other countries as well."

Quantity not exported before the close of the year.

92. The quantity of wheat not exported before the close of the year was 12,41,630 maunds, against 12,80,337 maunds in 1886 87, and 13,75,770 maunds in 1885-86.

GRAM AND PULSE.

93. The principal staples comprised under this head are *mutter*, *khesari mushuri*, *maskalai*, *moog*, *boot* or *chhola*, and *urhur*. The total quantity of the Calcutta trade in these grains during the past three years is shown below :—

Imports.

94. The import trade showed a steady increase, the figures for the past year being 26·37 per cent. and 62·20 per cent. in excess of those for 1886-87 and 1885-86, respectively. The supplies carried by the East Indian Railway showed a large decrease of 29·92 per cent., while the quantity carried by the Eastern Bengal State Railway showed an increase of 178·56 per cent., and that by country boats of 61·62 per cent.; the imports by inland steamers however decreased by 55·90 per cent. The exports from Nuddea were nearly double those of 1886-87, the increase having been due to an excellent gram harvest in that district.

The fluctuations of trade in gram with foreign ports are explained by the Collector of Customs, Calcutta, who makes these remarks :—

"There has been a marked advance in exports of gram to foreign countries, the increase over the figures of the previous year being 38·8 per cent. in quantity and 41·8 per cent. in value. Larger shipments have again been made to Mauritius, Ceylon, and the Straits, and the exports in the coasting trade, especially to Burma, have also been on an extensive scale. There has apparently been an ample supply of gram in this market during the past year, but the demand has still been sufficient to raise prices."

100. After deduction of the total exports from the total quantity imported into Calcutta, there remained a surplus of 18,71,850 maunds, against 18,82,588 maunds in 1886 87, and 17,47,373 maunds in 1885-86.

The rice harvest was excellent, and this helped largely to meet the active demand which existed throughout the year, in consequence of short food-crops in the Upper Provinces, and the growing needs in European countries. Regarding this latter section of the trade, the Collector of Customs, Calcutta, makes the following remarks :—

"The demand for rice in continental Europe has of late years greatly increased, the cleaning of rice being done on a larger scale there than before. Formerly rice was mostly milled for export in England, but now there are rice mills established in several places

on the continent, hence the increased exports from Hamburg, Bremen and Antwerp, and a corresponding decrease from the United Kingdom. The figures of exports of rice from the United Kingdom for the past three years are as follows:—

102. The increase noticed in the imports of rice into Calcutta in 1886-87 was considerably extended during the year under report, the figures being over 171¾ lakhs of maunds against nearly 146¾ lakhs of maunds in 1886-87, and 139¾ lakhs of maunds in 1885-86. By far the largest increase occurred in the quantities carried by country boats, the figures for which rose by 30·86 per cent. on those of 1886-87. The consignments by the East Indian Railway fell off by 21·68 per cent., but those by the Eastern Bengal State Railway showed an advance of 14 96 per cent., while the road traffic exhibited an increase of 15·49 per cent.

The succeeding abstract gives the sources of supply, Province by Province, together with the channels through which the consignments were received during the past three years.

The greatest improvement occurred in the supplies from the Backergunge and Midnapore districts. Of the four sub-divisions in the former, in two the *amun* rice, which is the principal crop, yielded a 16-anna harvest, while in the other two sub-divisions the outturn was an 18-anna crop. As regards Midnapore, the *amun* crop in the Tumlook sub-division was a 20-anna one, but in other portions of the district it was below the average.

Exports.

108. There has been an increase in the exports of rice of 34·30 per cent. as compared with 1886-87, and of 46·40 per cent. as compared with 1885-86. On the other hand, the trade in paddy fell off by 26·38 per cent. and 42·22 per cent., respectively. The details of the sea-borne trade during those years, are shown in the following statements :—

The Customs report of the past year contains the following account of the fluctuations in the exports to foreign countries:—

"The Indian rice harvest in the past year was abundant, and the rise in exports over 1886-87 amounted to 32·2 per cent. Ceylon, which depends principally upon Calcutta for rice, took over half a million cwt. more than in the previous year. Except Reunion, Arabia, China and the Maldive islands, all the other countries mentioned in the table took more. The demand for rice in the English market was not exceptionally strong, the increased shipments being due in a great measure to shipowners buying rice themselves for a return cargo rather than accept unremunerative rates of freight. The effect of this was to overstock the market, and had not supplies from Saigon and Siam been drawn off by the China demand, the fall in price consequent on the oversupply would have caused severe losses.

"Mauritius has taken 37·8 per cent. more rice in 1887-88, as the shipments to the island for the previous year were short. It is brought to my notice that an article, called "choora" and treated hitherto as "provisions, other sorts," was now being exported to Mauritius and Ceylon to the extent of about 15,168 cwt. per annum. This is simply rice for which the boiling process in use for husking is prolonged, and then the rice beaten flat without any admixture whatever. I therefore referred as to whether it should be charged with duty, and it was decided that it should not.

"The total exports of paddy were lower by 18·1 per cent. than in 1886-87. These exports are chiefly to Ceylon and Hong-Kong. Ceylon took a larger quantity, Hong-Kong less by about 20,000 cwt. The fall to the latter place was made up from Siam and Saigon, which have the advantage of us to the extent of the export duty, and so are able to command the market there in respect of common rice required for distilling purposes."

Paddy is not included in the foregoing statement. The total imports of paddy during the past year being 13,45,110 maunds, and the total exports 3,21,264 maunds, there remained a balance of 10,23,846 maunds, which at the rate of 25 seers of rice to a maund of paddy, is equivalent to 6,39,904 maunds of rice.

MISCELLANEOUS SPRING AND RAIN CROPS.

110. Under this heading are included barley, *kodo*, *shama*, Indian corn, oats, millets and other crops, which are reaped during the spring and rainy seasons. The amount of the Calcutta trade in these staples during the past three years, was as follows:—

111. In the import trade, which fell off by 18·16 per cent. and 20·86 per cent. on the returns of the two years 1886-87 and 1885-86, respectively, the largest decrease, namely, 73,719 maunds, occurred in the quantities carried by the East Indian Railway, the supply brought by country boats also showing a slight decrease of 6,574 maunds as compared with 1886-87. There has been a large falling off in this trade during the past year, and the following extract taken from the Customs' report explains the cause of the fluctuations, which characterized the business of the year:—

"For two or three years past heavy purchases have been made in Europe on account of possible requirements for military purposes, and these stocks not having been actually required for use, have accumulated. The continued keen demand throughout the past year I should therefore attribute to speculative purchases made on the same account. There being a speculative, and not a real demand for immediate consumption, low prices only were offered, and supplies in this market began to get scanty; but towards the close of the year they increased, though prices were still tending downward."

116. The importation of hides was below the figures for 1886-87 and 1885-86 by 17·04 per cent. and 27·51 per cent. respectively. The decrease was most marked in the supplies carried by the East Indian Railway, the figures being 18·10 per cent. and 34·39 per cent. lower than those of the two previous years. The sources of supply, classified by provinces, were these:—

By far the largest falling off was in the despatches from the Dacca Division, the decrease in the exports from the Dacca district alone amounting to 269,014 hides. No cause has been assigned for this, but in his general administration report for 1887-88, the Commissioner remarks that "this trade in the Dacca district is fast declining." The exports from the Presidency Division fell off by 96,691 hides, of which 58,098 hides were in the consignments from the Nuddea district.

The Collector of Customs, Calcutta, writes:—

"The exports of raw hides have again declined, the number exported in 1887-88 being 19·4 per cent. lower than in 1886-87, though the average weight per piece is slightly higher. A larger quantity, however, of dressed hides were exported, mostly to the United Kingdom. The demand for hides in this market was throughout the year under report keener than the condition of the leather trade in Europe would have seemed to warrant."

Comparison of imports with exports.

122. The deficit in imports over exports was 116,217 pieces, against a similar deficit of 353,206 pieces in 1886-87, but in 1885-86 the imports balanced the exports with a surplus amounting to 588,868 pieces.

124. It will be seen that there was a falling off both under imports and exports as compared with 1886-87, during which year the figures reached the highest limit since 1876-77. The customs duty on imported salt was raised from Rs. 2 to Rs. 2-8, with effect from the 19th January, 1888. The Collector of Customs makes the following remarks regarding this trade during the past year:—

"The supplies from the United Kingdom were larger, but the Mediterranean salt stopped coming altogether. This can hardly be satisfactorily accounted for by the rise in freights; for had there been a good market for it, some, at any rate, of this salt would have found its way here as usual. It seems more likely that the trade has been killed by the salt of the same kind from the Arabian ports and Aden, the sun-evaporated salt from these ports and the Mediterranean being identical. The Egyptian troubles originally stimulated the Mediterranean salt trade, when an Italian, seeing there was an opening for an important trade, arranged for manufacturing salt at Aden, and it stands to reason that the Mediterranean salt having to carry an export duty, heavier freight, and Suez Canal dues, could not hold its own against an extended manufacture at Aden and the Arabian ports, which have besides entirely the advantage in point of climate for the manufacture of sun-evaporated salt.

"The increase of duty at the close of the year to Rs. 2-8 per maund, the terms of section 37 of the Sea Customs Act, and the fact that a great quantity of the available salt had already been bought up on speculation by a large dealer, combined to run up the price of salt to a quite unusual height."

According to the published fortnightly prices-current returns, the average retail price of salt in the Lower Provinces during 1887-88 was 5 chittacks, or 2·72

per cent., above that of 1886-87, and 10 chittacks, or 5·29 per cent., above that of 1885-86. The following comparative statement shows the details for each district separately during the past two years :—

125. The falling off in the imports by sea amounted to 3,90,137 maunds, or 3·89 per cent., as compared with the figures for 1886-87, but they showed an increase of 9,52,965 ıaunds, or 10·97 per cent., as compared with those of 1885-86. The different orts which contributed to the trade during the past three years are shown in ıe subjoined statement.

The cessation of importations from Italy is attributed to the "growth of the salt trade with Aden and the Arabian ports."

126. The total quantity of indigenous salt imported into Calcutta by the East Indian Railway during 1887-88 was 353 maunds against 300 maunds in 1886-87, and 332 maunds in 1885-86. Of the past year's supply, 276 maunds were received from the Punjab, 76 maunds from the North-Western Provinces, and 1 maund from Rajputana and Central India.

Exports.

127. The quantity of salt exported from Calcutta during the past year was 3,70,182 maunds, or 4·19 per cent. lower than in 1886-87, but 1,99,668 maunds, or 2·42 per cent. in excess of the figures for 1885-86. The traffic carried by rail showed a decrease of 4·70 per cent., namely, 1,16,912 maunds, or 3·11 per cent., on the East Indian line, and 1,12,015 maunds, or 10·11 per cent., on the Eastern Bengal line. The exports by country boats, which amounted to 38·06 per cent. of the total trade, were 1,49,120 maunds, or 4·43 per cent. less than in the previous year. The quantity carried by inland steamers exhibited a decrease of 836 maunds, or ·21 per cent., and the road traffic of 1,196 maunds, or 2·36 per cent., on the trade of 1886-87. The following comparative statement shows the different provinces to which salt was consigned from Calcutta during the past three years.

Comparison of imports with exports.

128. The result of the year's traffic was a surplus of imports over exports to the extent of 11,83,596 maunds, against 12,03,498 maunds in 1886-87, and 4,30,278 maunds in 1885-86.

Clearances from ship-board and bond.

129. The total quantity of salt on which duty was paid in Calcutta and the 24-Pergunnahs during the past three years, as compared with the quantity sent to the interior from Calcutta, was as follows:—

130. According to the foregoing figures, the total quantity of salt retained for consumption in Calcutta and the Suburbs, Hooghly, and a part of the 24-Pergunnahs district, and also available for export to the interior, was 9,00,444 maunds, against 8,61,454 maunds in 1886-87, and 8,23,467 maunds in 1885-86.

SALT TRADE OF BENGAL.

Imports.

131. The total quantity of salt sent direct from Calcutta to the different Divisions of the Lower Provinces, other than those of Behar, was as follows:—

	1885-86.	1886-87.	1887-88.
	Mds.	Mds.	Mds.

Saltpetre is brought to Calcutta chiefly for export to European countries. The Collector of Customs, Calcutta, makes the following remarks regarding this trade:—

"The exports of saltpetre, which are chiefly from Calcutta, have been gradually declining for some years past, last year's figures being 2·6 per cent. under those of 1886-87. This is due to the natural saltpetre, which is found only in India being now competed with in the consuming markets of Europe by artificial saltpetre, which is obtained by a process of mixing nitrate of soda with chloride of potash. Nitrate of soda for the purpose is brought in large quantities from Chili and Peru, and it may be mentioned that saltpetre is used largely in the making of chemical manures as well as gunpowder."

137. There was very little change in the total quantity imported during the past three years. Last year, the supply carried by the East Indian Railway, however, showed a considerable increase of 8·24 per cent. and 2·04 per cent. on the figures for

Imports.

1886-87 and 1885-86, respectively, while the imports by boat and inland steamers were very insignificant. The following statement shows in detail the different provinces from which saltpetre was sent to Calcutta during the past three years:—

The Collector of Customs, Calcutta, writes:—.

"In the Calcutta market the past year's trade has been characterised by a scantiness of supplies and difficulty in obtaining saltpetre at rates which would enable it to compete successfully in Europe with artificial saltpetre. It has been alleged that a check has been given to the trade by the Salt Department now in charge of the Patna Division strictly insisting on all salt extracted in the process of manufacture either being destroyed, or paying duty, and, if so, this is of course a salutary check. It certainly is not desired to stimulate the exports of Indian saltpetre by a bounty, which the practical remission of Rs. 2-8 of duty on all salt evolved in the manufacture would clearly amount to. Last year's trade with Hong-Kong was a fair average one, the demand for saltpetre in this direction being for the manufacture of different descriptions of fireworks."

Quantity not exported before the close of the year.

142. The quantity of saltpetre not exported before the close of the year was 1,15,296 maunds, against 83,204 maunds in 1886-87, and 93,578 maunds in 1885-86.

LINSEED.

143. The trade of Calcutta in linseed during the past three years is shown in the following statement:—

Imports.

144. The imports showed an increase of 3·44 per cent. and 26·28 per cent. on the trade of the two previous years respectively. The advance in the imports by the East Indian Railway was 2·06 per cent., while the boat traffic returns exhibited an increase of 11·48 per cent. as compared with those of the previous year. The distribution of the imports is classified by provinces in the subjoined statement:—

The increase shown against Behar is chiefly due to an increase of 1,13,612 maunds in the supplies from Bhagulpore, 92,899 maunds from Durbhunga, 56,470 maunds from the Sonthal Pergunnahs, 51,106 maunds from Sarun, and 19,045 maunds from Mozufferpore, against a decrease of 1,12,610 from Shahabad, 33,136 maunds from Chumparun, 30,827 maunds from Gya, and 16,423 maunds from Patna.

The Collector of Customs, Calcutta makes the following observations on the causes of the fluctuations in the trade with foreign countries:—

"The figures in 1887-88 are 280,523 cwt., or 4·9 per cent. above those of 1886-87, and they are the highest in the table. This advance has been chiefly in exports to the United States which had in the two previous years taken less. Europe too took a larger quantity from Calcutta, while the United Kingdom took less. After a cessation of exports in 1886-87, 53,026 cwt. were exported last year again to Egypt, but this all went eventually to Europe. Prices were, in sympathy with the English market, very low throughout the year, the competition of Russian and South American linseed having brought this about. The quality of the linseed from Russia and South America was reported to have greatly improved. The quantity of linseed exported from Calcutta bears the following comparison with the figures for the whole of India:—

	1886-87.			1887-88.		
	Cwt.			Cwt.		
From India ...	8,656,933	100	per cent.	8,422,515	100	per cent.
" Calcutta ...	5,619,522	64 9	"	5,899,857	70	"

Quantity not exported before the close of the year.

The deficit of imports over exports during the past year was 42,914 maunds, against a surplus of imports over exports of 72,311 maunds in 1886-87. In 1885-86, however, the exports exceeded the imports by 98,556 maunds.

MUSTARD SEED.

148. The following statement gives the total quantity of mustard seed imported into, and exported from, Calcutta during the past three years:—

Imports.

149. The total trade under imports showed a decrease of 16·04 per cent. in comparison with 1886-87, and of 25·42 per cent. when compared with 1885-86. The imports by the East Indian Railway and by country-boats were respectively, 18·74 per cent. and 31·29 per cent. below the previous year's figures but the traffic carried by inland steamers showed an advance of 13 63 per cent. The sources of the supply, province by province, were as follows:—

Of the Behar districts, Patna showed the largest falling off, viz., 2,21,485 maunds; then the Sonthal Pergunnahs, 1,61,216 maunds; Durbhunga 1,44,077 maunds; and Bhagulpore 80,693 maunds. Of the increase shown against Assam, Kamroop contributed 65,488 maunds, and Goalpara 48,885 maunds.

The increase in the supply received from the North-Western Provinces and Oudh was chiefly in the despatches from Moradabad (1,21,791 maunds), Allyghur (36,444 maunds), Baraich (26,960 maunds), and Gonda (12,967 maunds).

Regarding the exports of mustard seeds to foreign ports, the Collector of Customs, Calcutta, remarks as follows:—

"*Rapeseed*—Has again heavily declined, the shipments last year from Calcutta being 45 per cent. below what they were in 1886-87. The decline has been greatest in exports to the United Kingdom, where the article seems to have lost much of its importance owing to short receipts from India, the demand on the continent of Europe having absorbed most of the supplies."

Quantity not exported before the close of the year.

154. The imports balanced the exports with a surplus, amounting to 11,72,221 maunds, against 12,15,435 maunds in 1886-87, and 9,85,974 maunds in 1885-86

SILK, RAW.

155. The total quantity of raw silk carried to, and from, Calcutta during the past three years, was as follows:—

156. The following extract from the Custom's report for 1887-88 explains the condition of this trade in the silk markets in Europe:—

"There was an impetus given to the silk markets in Europe by the belief which spread early in the year, that a fashion was setting in for pure silks, and a rapid fall in exchange with the East enabled a large quantity of China silk to be offered in the London market at favourable rates. This competition had no doubt the effect of lowering the price of Indian silk, and the market here was for a time very dull. Afterwards, however, Indian silk recovered its position in the London market, where all offered for sale was readily bought. This recovery was due to two causes, viz., telegraphic information from China late in the season of damage to, and a probable short outturn from, the second China crop; and secondly, to the anticipation of a late and inferior Italian crop owing to inclement weather.

Imports.

157. The imports during the past year were almost equal to those of 1886-87, but they showed a slight rise of 15·15 per cent. on the returns of 1885-86. The Annual Administration Reports for the year 1887-88 contain the following remarks on the silk industry in the Lower Provinces:—

Burdwan Division.—The principal seats of this industry are in the districts of Midnapore and Beerbhoom. The total outturn of the year in Midnapore was 923 maunds 15 seers, valued at Rs 4,38,318, against 596 maunds 17 seers, valued at Rs. 3,99,401, in the previous year The Beerbhoom district turned out 22,190lbs, worth Rs. 2,11,689, against 19,916lbs., worth Rs. 1,98,429, in the preceding year. Silk fabrics are manufactured in Midnapore, Bankoora, and Burdwan.

"The cloths known as *gorud* of Mymari in Burdwan, and *kutni* of Birsingpore in Bankoora, are well known. Silk-worms are reared on mulberry in Beerbhoom, Bankoora, and Midnapore.

"Except Hooghly and Howrah, tusser silk is manufactured more or less in all the districts The total outturn in Burdwan is reported to be 322,505 yards, valued at Rs. 1,52,603, against 56,020 yards, worth Rs. 51,765, in the previous year. This large increase is attributed to increased demand for this fabric in Europe. In the other districts, however, the industry did not prosper. In Bankoora tusser worth Rs 25,000 was manufactured during the year. The industry was greatly affected by the purchase by some European firm of a large quantity of cocoons for exportation to Europe. A slight improvement has set in, as the exporters have contracted their operations, having found the speculation unprofitable. In Beerbhoom also the outturn fell from 11,000 yards, worth Rs. 8,800, to 4,420

yards, worth Rs. 3,100. In Midnapore the tusser speculation ended disastrously. The two firms of Messrs. Watson and Company and L. Payen competed against each other, and prices went up to such an extent as to almost ruin petty local weavers. The firms in the long run suffered, having found no market for their goods in Europe.

Presidency Division.—The principal manufactures of the Moorshedabad district are silk and indigo. During the year there were 77 filatures in the district, against 91 in the previous year. They produced 371,458 lbs. of silk, the value of which amounted to Rs. 23,38,183. In 1886 the quantity manufactured was 230,120 lbs., and its value amounted to Rs. 17,22,765.

Rajshahye Division.—Silk is principally manufactured in Rajshahye. In Bogra the industry is almost extinct. The outturn of silk in Rajshahye is estimated at 99,440lb, against 86,080lb in the previous year. Endi silk is manufactured in Dinagepore, Rungpore, and Julpigoree; it is principally used for home consumption."

Bhagulpore Division.—"The tusser silk industry in Bhagulpore is not flourishing. The supply of cocoons is scanty, and the prices high owing to the purchases made by European firms near Tinpahar. The number of looms is only one-third of what it was ten years ago. The industry now seems to be concentrated in the hands of a few well-to-do men. Thirty-nine thousand nine hundred and forty-eight pieces, valued at Rs. 1,00,356, are said to have been exported this year. This shows an increase in outturn, but decrease in prices. Besides the two principal silk manufactories of Bholahat and Baraghoria in the Maldah district, both of which are under European supervision, a third was started during the year at Kaliachuck Indigo Factory. The work is under the supervision of a French gentlemen, who was formerly with Mr. Gallois at Berhampore. Attempts are being made to improve the quality of the silk by inducing natives to take more care of their worms, and by judicious use of European mulberry seeds With this view European seed has been distributed and foreign cocoons introduced. Some experiments are also being made, and it is said successfully, to get over the difficulty of spinning tusser by means of a chemical process. The outturn of the Baraghoria and Bholahat factories during the year was—

Baraghoria	241 maunds.
Bholahat	125 do.

"There are numerous native filatures. The large manufacturers export direct to Calcutta and the North-Western Provinces, but the produce of the small filatures is for the most part sold within the district, the chief markets being Amanigunge and Sadullapore. The manufacture of silk fabrics is decaying owing to the competition of European-made fabrics of a better and cheaper quality."

Chota Nagpore.—In Hazaribagh, the Company by which silk filatures were started has closed business, apparently because the venture failed to be as remunerative as was originally expected.

"In Lohardugga a silk filature was opened by Messrs. Hodges and Radford in the Government village of Pakraha, four miles from Daltongunge; but the Deputy Commissioner has been unable to procure any information regarding its working."

Principal railway stations.

158. The imports by rail during the past year were for the most part consigned from Azimgunge, (5,866 maunds against 5,122 maunds), and Damookdea, (4,425 maunds against 4,725 maunds in 1886-87).

Principal river marts.

159. The greater part of the supply imported by country boats was consigned from Ghattal (2,397 maunds against 3,787 maunds), and Midnapore, (1,455 maunds against 1,451 maunds).

Exports.

160. The amount of silk exported from Calcutta during the past year was 1·22 per cent. below the figures for 1886-87, but 10·63 per cent. in excess of those for 1885-86. The bulk of the trade was sea-borne, and its destination was as follows:—

The Collector of Customs, Calcutta, observes :—

"The exports of raw silk from Calcutta have in 1887-88 slightly increased, but there has been a fall of 1·7 per cent in the value. This fall is both in reeled silk and in *chussum*, which is short length silk, termed also waste silk, while a larger quantity and value of cocoons have been exported. There has been much more *chussum* exported than reeled silk, and nearly the whole outturn of this waste silk goes to the United Kingdom and France, where it enters largely into the manufacture of silk-mixed piece-goods.

"The consumption of raw silk in manufactures was after all not so rapid as it was expected to be, for manufacturers disregarded the estimates pointing to short supplies later on, and bought only for their immediate requirements

"The Lyons market was unusually flat, especially at the close of 1887, and the demand there for Bengal silks in particular was languid. The stocks of Bengal silk in the United Kingdom at the close of the years 1886 and 1887 are given below, and the accumulation at the close of the latter year is said to be in well-reeled filature silks, which ought to command a good market, but are too highly priced to compete successfully with European raw silk.

161. After deduction of the gross exports from the total quantity imported into Calcutta, there remained 2,929 maunds, against 3,050 maunds in 1886-87, and 1,661 maunds in 1885-86.

Quantity not exported before the close of the year.

SUGAR.

162. The total weight of sugar carried to, and from, Calcutta during the past year is compared below with the totals of the two previous years:—

163. The supply of drained sugar brought to Calcutta was 28·91 per cent. in excess of the figures for 1886-87 and 43·88 per cent. over those for 1885-86. The imports of undrained sugar also increased by 20·48 per cent. and 15·20 per cent. on the returns of the two previous years, respectively. Compared with 1886-87, the traffic carried by country boats showed an increase of 18·66 per cent. under drained and of 11·71 per cent. under undrained sugar. In the figures of road traffic, undrained sugar exhibited an advance of 32·19 per cent. In the trade by other internal routes the fluctuations were normal. The seaborne imports, however, showed the largest increase, namely, 47·74 per cent. under drained and 37·38 per cent. under undrained sugar. The statement

164. As shown above, the increase in the imports of both refined and unrefined sugar by sea, noticed in the last report, was maintained and still further augmented during the year under review.

The Collector of Customs, Calcutta, observes as follows :—

"Most of the sugar imported here is cane sugar from Mauritius, but we also now import beet sugar from the United Kingdom and Austria.

"The only cane sugar that can in these days compete with beet sugar is that from Mauritius, the West Indies, and lastly, with difficulty, Java.

"The following are the figures of the quantities from different places imported into Calcutta in the last two years :—

	1886 87.	1887-88.
	Cwts.	Cwts.
United Kingdom	19,858	35,292
Austria	9,893	4,080
Mauritius	78 008	52,584
Java	19,431	33,935

"This has all no doubt gone into consumption and affected the manufacture for local wants as well as helping to extinguish that for export."

165. The following remarks are extracted from the general administration reports for 1887-88 of the Commissioners of the Presidency, Rajshahye, and Bhagulpore Divisions, regarding the condition of the sugar industry in those divisions :—

Presidency Division—" In the 24-Pergunnahs goor and sugar form an important local industry. The approximate outturn of goor from date-palm was 3,16,700 maunds during the year under report. About one-third of this was consumed locally or exported to Calcutta and elsewhere, the rest being converted into sugar at Goberdanga and other local factories. The local price of goor from date-palm varied from Rs. 2-8 to Rs. 2-14, and of sugar from Rs. 5-12 to Rs. 6 per maund. The area under sugarcane in the district is estimated to be 15,850 bighas, yielding about 4,00,000 maunds of goor, of which about three-fourths was exported to Calcutta and elsewhere, and the rest was converted into sugar or consumed locally. The price of goor from sugarcane varied from Rs. 3 to Rs. 3-8, and of sugar from Rs. 8 to Rs. 8-8, against Rs. 3 to Rs. 3-8 and Rs. 11 to Rs. 12 per maund, respectively, in 1886-87.

"The sugar mills at Cossipore turned out 86,000 maunds of sugar during the year valued at Rs. 8,00,000, as compared with 84,000 maunds, valued at Rs. 8,40,000, in 1886-87. There are in this district some 170 smaller factories in which sugar is refined according to the native method. The outturn of these is estimated at about 400 tons.

"Sugar is manufactured all over the Jessore district, the principal place of manufacture being Kotechandpore in the Jhenidah sub-division. There is one manufactory at Kotechandpore where refined sugar is manufactured. This factory turned out 14,833 maunds of sugar during the year 1887, against 16,400 maunds in the year preceding. The value of the quantity manufactured is said to be Rs 1,18,103 against Rs 1,22,238. Unrefined sugar, called "dalua," to the extent of 3,19,225 maunds is reported to have been manufactured during the year, against 3,43,743 maunds in the year previous. The total value of the manufacture of this year is estimated at Rs. 17,27,023 against Rs. 19,81,806. There were about 200 sugar factories at work in the district during the year. The decrease in the outturn of sugar is said to be due to the dulness of the market. This industry has begun to decline since foreign sugar has been brought into the market. The selling price of sugar was the

same as in the year preceding. Besides sugar, a large quantity of goor or molasses is manufactured from date juice, and a small quantity from sugarcane juice. The manufacture of sugarcane goor, it is stated, is increasing as the cultivation of the plant is extending.

"In Khoolna, sugar is the only important industry. During the year the outturn was about 50,000 maunds, against 60,000 maunds in the year preceding."

Rajshahye Division.—"In Rajshahye and Rungpore the cultivation of sugarcane and the manufacture of molasses are reported to have increased during the year. The use of Beheea mills is being largely extended."

Bhagulpore Division.—"There is nothing of importance to report under this head, except that the Beheea mills were largely used in Monghyr. The cultivation of sugarcane is on the increase in Bhagulpore. The Collector found a variation of the Beheea mill at work in the south, which was said to be both better and cheaper. It is turned out at Calcutta and sold at Deoghur. Prices of *goor* fell, and the heavy rain of May damaged the outturn."

Exports.

167. In the case of drained sugar, the exports showed an advance of 14·23 per cent. and 40·32 per cent. as compared with those of 1886-87 and 1885-86, respectively; while as regards undrained sugar, the figures rose by 27·56 per cent. and 26·48 per cent., respectively. The quantities shipped from Calcutta by sea during those years were destined as follows:—

As regards drained or refined sugar, the Collector of Customs, Calcutta, writes:—

"The export trade in refined sugar, which has ceased to be of any importance since 1883-84, and which nearly disappeared in 1886-87, has for the past year risen to an insignificant 14,709 cwt. We keep the heading as an export, but I am afraid no abolition of sugar bounties in Europe will suffice to bring the trade back to its old position, and that as an export it must linger on in the same valitudinarian, not to say moribund, condition as safflower. We ought I think to make it a heading of imports instead, for in last year we imported 311,286 cwt. to supplement the quantity manufactured in the country for local consumption."

Quantity not exported before the close of the year.

168. After converting drained into undrained sugar at the rate of one maund of the former to 2½ maunds of the latter, the total of the year's traffic aggregated 24,38,008 maunds under imports, and 9,47,379 maunds under exports, leaving a balance of 14,90,629 maunds not exported before the close of the year, against a similar surplus of 11,54,301 maunds in 1886-87, and of 11,75,846 maunds in 1885-86.

170. The advance shown in the figures for 1886-87 was further extended during the year under report, but the average price per lb according to the Customs return fell from 9 annas 9 pies in 1885-86, and 9 annas 6 pies in 1886-87 to 9 annas 5 pies in 1887-88. The remarks made by the Collector of Customs, Calcutta, on the general condition of this trade during the past year are extracted below :—

"A satisfactory feature of last year's trade was the greater rapidity with which the produce was brought down and disposed of owing to improved communications.

"The Port Commissioners' Tea warehouse was opened in July last and made use of by several of the large Agency firms, about 184,000 chests, or 20 per cent. of the season's outturn, having passed through it; when this has been brought into full working order and use, it will no doubt be a great advantage to the trade.

"The Indian Tea Supply Association has been at work during the year, and an attempt was also made to permanently reduce freights by establishing a line of steamers, called the Planters' Line, to London. The object of the former is to stimulate the consumption of tea by natives, and, I am informed, it has met with as much success as, considering the short time it has existed, could have been expected. The Planters' Line has collapsed; the other lines apparently combined to snuff it out, so that the position of shippers is unaltered.

"The following was the estimate of the crop expected last season from the different tea-growing districts:—

	lbs.
Assam	37,929,861
Cachar and Sylhet	27,198,186
Darjeeling, Teari and Dooars	14,325,782
Chittagong and Chota Nagpore	1,432,030
Dehra Doon, Kumaon and Kangra	3,750,000
Private and native gardens	1,600,000
Total ...	86,135,859

"The actual exports have, it will be seen, exceeded this estimate without counting the local consumption. This was chiefly due to a falling off in China tea, the exports of congoes from there having diminished by 30 million lbs. owing to a short crop."

171. The following accounts of the tea industry in the Rajshahye, Chittagong, and Chota Nagpore Divisions are given in the Divisional Administration Reports for the past year :—

Rajshahye Division.—"The number of tea-gardens in Julpigoree and Darjeeling, the area under cultivation in acres, gross yield in pounds, and the average yield per acre from mature plants, are shown in the following table :—

Districts.	Number of gardens.			Area under cultivation in acres.						Gross yield in pounds.			Average yield per acre for mature plants.

"It was stated in my last report that no returns had been received from 27 gardens in Julpigoree, and that the figures in respect of them had been taken approximately. The figures for the year 1886 now supplied are correct. The decrease of five gardens in Darjeeling is owing to the closing of one garden and the amalgamation of four old gardens with others. Both districts show an increase in the gross yield, which is the natural result of the further development of the existing gardens."

Chittagong Division.—"The export of tea from Chittagong again shows a distinct increase, the amount being 1,126,446 lbs. against 1,034,995 lbs. in 1886-87, an increase of 91,451 lbs. Of the above, only 5,165 lbs. were exported directly to the home market, the balance going to Calcutta. The increase in value of the tea exported was only Rs 16,757 owing to the poor prices realized.

"The prices obtained by the great majority of the gardens, however, compare very favourably with those obtained by gardens in other districts, and those gardens which have sufficient acreage under tea pay well. The season was a good one, both for quantity and quality."

Chota Nagpore Division.—"Tea is grown in the two districts of Hazaribagh and Lohardugga, but in neither was the past year favourable for its growth In Hazaribagh 'the dearth and dearness of labour' is said to be a yearly increasing difficulty, owing to which and the unsuitable nature of the soil and the unfavourable climatic influence, there seems to be no likelihood of any material development of the industry. In Lohardugga, owing to the unseasonable rainfall of the year, the total outturn was less than that of the previous year. Chota Nagpore teas are but little esteemed in the Calcutta market, and are sold for so low a price as three annas per pound.

"The following table gives the statistics of tea in the two districts :—

Districts.	Number of gardens.	Area under cultivation.			Approximate yield in pound.	Average yield per acre of mature plants	Average yield per acre of mature plants in 1886-87
		Under mature plants	Under immature plants	Total.

172. The import trade of last year exceeded that of 1886-87 and that of 1885-86 by 16·63 per cent. and 26·51 per cent., respectively. The quantity brought to Calcutta by inland steamers was 17·83 per cent. in excess of the imports by that route during the preceding year, and that brought by the Eastern Bengal State Railway increased by 15·46 per cent. The following comparative statement shows the importation of tea from the several provinces during the past three years :—

Commenting upon the exports of tea to foreign ports, the Collector of Customs, Calcutta, observes—

"While showing according to our figures a very small decline in the average price per lb., the exports of Indian tea again show a satisfactory advance in quantity over the figures of the previous year, viz., more than 8¼ million lbs., or 11·1 per cent., giving an increased nominal value of nearly 46 lakhs. or 10 per cent. I say nominal advisedly, for I put little trust in our values for tea during the past year, but hope for the current one to secure more reliable figures.

"There were the following imports into the United Kingdom of all descriptions of tea in the past three years:—

	1885.	1886.	1887.
	lbs.	lbs.	lbs.
From British East Indies ..	68,635,100	80,987,351	98,830,117

„ Other countries	3,901,927	4,796,345	5,194,054
Total ...	212,375,371	230,895,292	222,763,287

"The deliveries in London of China, Indian, and Ceylon teas and the stocks at the close, for the past two years are as follows:—

	1886.	1887.
	lbs.	lbs.
Deliveries	220,884,000	215,779,000
Stocks	103,157,000	103,458,000

"The stocks have not varied to speak of, but the consumption has fallen in the last year by five million lbs, which is probably due to the fact that the Indian and Ceylon teas, which came in to make up the shorter imports from China, have gone further than China teas: it is not that less tea has been drunk, but that less of the leaf has been required for brewing it.

"The great advantage that Indian tea has over China in this respect ought, it would seem, to go far in enabling it to oust the China tea from the English market, but it is a question of flavour, and pure Indian tea unmixed with China has not as yet, I believe, as large a retail sale in the United Kingdom as we in India who have acquired the taste think, on its merits, it ought to have; nor does it appear certain how the battle might go, were circumstances to arise which enabled China to make the most of her resourses for the production of tea.

"Our exports last year to the United States are discouraging to any hopes of a market in that direction, and the 50 million lbs. which roughly are consumed there are still drawn from the best China teas; clearly the Americans insist on the China flavour.

"The market to Australia improved, probably owing to the short crop in China, but exports there are still an insignificant fraction of the total tea consumed, which for the Australian Colonies and New Zealand may be estimated at between 30 and 35 million lbs. The fact that the retail trade is largely in the hands of Chinese in those countries may partially account for this, but the chief reason, no doubt, is that the Australians and New Zealanders like the Americans, prefer the taste of China tea.

"Tea in Ceylon has been making steady progress, the exports for the past five years being—

1883.	1884.	1885.	1886.	1887.
lbs.	lbs.	lbs.	lbs.	lbs.
1,665,768	2,392,973	4,372,721	7,849,888	13,834,057

"The liking for this tea in the United Kingdom continues, and Ceylon may later on be a formidable competitor, though the outturn is as yet very far from approaching that of India."

Quantity not exported before the close of the year.

178. Last year the quantity exported was 39,779 maunds in excess of the imports, against a similar balance of 81,544 maunds in 1886-87, and of 28,255 maunds in 1885-86.

181. The imports during the past year exceeded those of 1886-87 by 1·75 per cent., but they were below those of 1885-86 by 6·06 per cent. The consignments by the Eastern Bengal State Railway showed an increase of 5·26 per cent. in comparison with 1886-87, but a decrease of 9·03 per cent. as compared with 1885-86. Similarly, the traffic attracted to the inland steamers increased by 32·23 per cent. on the returns of 1886-87, but decreased by 24·93 per cent. when compared with 1885-86. The road traffic returns exhibited a falling off of 4·21 per cent. and 18·73 per cent. on the figures for those two years respectively. The distribution of the imports is classified according to provinces in the following statement :—

The outturn of tobacco last year in the Rajshahye Division was better than in the preceding year in all districts except Darjeeling. In Dinagepore, Bogra, and Rungpore the crop was a 16-anna one. In the Nuddea districts, which is the largest tobacco growing district in the Presidency Division, the crop was a large one. In Behar the yield was plentiful.

The following extract from the Calcutta Customs Collector's report relates to the fluctuations in the supplies shipped for foreign ports.

"There has been a fall in exports of tobacco amounting to 14·7 per cent."

"To France the trade has ceased entirely, and Italy is again tending, as in 1884-85 and 1885-86, to take none of our tobacco. The fall in exports to the United Kingdom has also been very heavy. The exports to other countries, however, show a large increase, the details being—

"There is a heavy fall to Gibraltar from 231,354lbs. in 1886-87, to 1,400lbs., and that trade would appear to be closing altogether."

During the year under report, the excess of imports over exports was 1,77,461 maunds, against a similar surplus of 1,64,578 maunds in 1886-87, and 1,98,628 maunds in 1885-86.

Quantity not exported before the close of the year.

CHAPTER XI.

INLAND AND SEA-BORNE TRADE OF CHITTAGONG.

THE sea-borne trade of Chittagong is dealt with in the report of the Collector of Customs, Calcutta, on Trade and Navigation; and it is also noticed in this report for purposes of comparison with the inland trade.

The total inland trade of Chittagong carried by country boat during the year 1887-88, is compared below with the figures for the two preceding years:—

	1885-86.	1886-87.	1887-88.
	Mds.	Mds.	Mds.
Imports	26,69,925	28,91,199	26,07,910
Exports	7,21,635	30,42,702	5,83,032
Total ...	33,91,560	59,33,901	31,90,942

2. The total trade registered during the past year showed a very large decrease of 46·22 per cent. as compared with that of 1886-87, but of only 5·92 per cent. in comparison with that of 1885-86, the decline in the import trade being trifling, viz., 9·79 per cent., but the export trade falling to $\frac{1}{5}$ that of 1886-87. The most noticeable items of increase in the year's traffic under imports as compared with 1886-87, were rice (1,10,227 maunds), paddy (72,599 maunds), cocoanuts, iron, oils, and Indian piece-goods. Last year, the harvests in the Chittagong Division were excellent and decidedly above the average; and, "although the year was not a healthy one, it was marked generally by prosperity and further improvement in the condition of the people." The chief staples in the export trade in which there was an advance as compared with the year preceding were piece-goods, pulses, and metals; and the articles in which the largest decreases occurred were bamboos (24,42,600 maunds) and salt (77,360 maunds)—the two articles in which the greatest improvement took place in 1885-86. The total value of the inland trade during the past three years, as compared with the sea-borne trade in those years, was as follows:—

		Imports.	Exports.	Total.
		Rs.	Rs.	Rs.
Inland trade	1885-86	76,45,714	21,66,681	98,12,395
	1886-87	78,11,713	41,25,977	1,19,37,690
	1887-88	63,82,372	33,99,884	97,82,256
Sea-borne trade	1885 86	94,85,595	1,13 25,446	2,08 11,041
	1886-87	1,17,93,941	1,12,79,372	2,30,73,313
	1887-88	1,34,89,992	1,55,92,823	2,90,82,815

The resolution of the Government of Bengal on the general administration report of the Chittagong Division for the year 1887-88, contains the following account of the sea-borne trade:—

"The total value of the trade of the Chittagong Port continues to increase, and now amounts to Rs. 2,90,82,789. This increase is mainly due to jute: the value of jute imported into Chittagong from Naraingunge being nearly a crore of rupees, and as this item appears a second time in the returns, the whole of the jute imported in country boats being again exported in large ships to England, it will be seen that jute alone accounts for more than two-thirds of the Chittagong trade. If foreign trade only be considered, it is found that the imports into Chittagong amounted to five and-a-half lakhs of rupees, consisting chiefly of salt and oil, while the exports amounted to a crore and twenty lakhs, of which Rs. 98,40,670 represent the value of jute, and Rs. 21,67,353 the value of paddy and rice. The increase in the export of rice as well as of jute is attributable to the good harvest."

3. *Lime and Limestone.*—The import traffic under this head carried by country boats fell off by 50·26 per cent. and 29·50 per cent. on the returns of 1886-87 and 1885-86, respectively. The decrease was due to stagnation in the demand for building purposes, a large number of houses being roofed with corrugated iron. The imports from Naraingunge aggregated 20,163 maunds, against 37,412 maunds in the previous year.

4. *Caoutchouc.*—The quantity exported by coasting vessels amounted in value to Rs. 16,884, against Rs. 1,925 in 1886-87, and Rs. 762 in 1885-86. There was no special facility afforded during the past year for procuring caoutchouc from the Hill Tracts, and the Collector observes that the exports were probably made from the supplies obtained in the previous year.

5. *Cotton, raw.*—The quantity of raw cotton sent to Naraingunge from Chittagong by coasting vessels and country boats was 69,666 maunds, being 158·76 per cent. in excess of the figures for 1886-87, and 163·82 per cent. over those for 1885-86. The detailed figures for those years are—

To Naraingunge from Chittagong.

YEAR.	By country boats.	By sea-going vessels.	Total.
	Mds.	Mds.	Mds.
1885-86	3,500	22,906	26 406
1886-87	12,880	14 043	26 923
1887-88	8,300	61,366	69,666

The supply sent to Calcutta was 10,970 maunds by country boats, and 17,797 maunds by coasting vessels. The yield of cotton in the Hill Tracts is said to have been "the best within the memory of men now alive," and the hillmen are same to have profited largely by its sale.

6. *Cotton twist and yarn.*—There was a recovery in the import trade in cotton twist and yarn, the supply carried to Chittagong last year by coasting vessels, amounting in value to Rs. 2,20,845, showing an advance of 19·67 per cent. and 14·11 per cent. on the returns of 1886-87 and 1885-86, respectively. The increase is attributed by the Collector to short importation in the previous year.

7. *Cotton piece-goods, European.*—There was little or no change in the supply of European piece-goods imported into Chittagong from Calcutta by coasting vessels during the past two years, but in comparison with 1885-86, the figures for 1887-88 showed a falling off of 12 20 per cent. The Commissioner of the Chittagong Division remarks that "in interportal imports the increase in the importation of yarn twist, coupled with a decrease in piece-goods, shows that in Chittagong at least native-made cloth woven with English thread is holding its own."

8. *Jute, raw.*—The advance noticed in 1886-87 in the imports of raw jute into Chittagong was maintained and still further extended during the year under report, the quantity received by coasting vessels being 20,26,925 maunds, against 17,63,758 maunds in 1886-87, and 13,02,390 maunds in 1885-86. The Commissioner explains that this large increase was due to the good crop of the season, and to the comparative cheapness of the Chittagong port. The quantity shipped for the United Kingdom from this port was 7·37 per cent. over the trade of 1886-87, and 78·80 per cent. in excess of that of 1885 86, as will be seen from the figures given below :—

9. *Gunny-bags.*—According to the coasting trade returns, the total value of gunnies sent to Chittagong from Calcutta showed an increase of Rs. 83,164 as compared with 1886-87, and of Rs. 42,938 as compared with 1885-86. This increase was in sympathy with the large advance in the rice trade.

10. *Cocoanuts.*—The harvest of cocoanuts during the past year in the Noakhally district, which exports largely to Chittagong, "was considerably above the average," and imports by country boats consequently showed an advance of 107,270 in number as compared with the trade of 1886-87, but a decrease of 3,276,696 as compared with that of 1885-86.

11. *Rice and Paddy.*—The import rice trade of Chittagong carried by country boats during the past three years, was as follows:—

As compared with 1886-87, the increase in the rice trade was 9·09 per cent., and in paddy 10 79 per cent. The principal marts which contributed largely to the past year's supply, as compared with the figures of the year preceding, were:—

The quantities of rice and paddy sent to foreign countries from Chittagong during the past three years, were as follows:—

		1885-86.	1886-87.	1887-88.
Rice	Cwts.	623,261	257,188	640,809

Paddy	Cwts.	6,612	14,929	4,432
	Mds.	9,000	20,320	6,032

The Commissioner of the Chittagong Division writes as follows on the causes of fluctuations in the exports to home and foreign ports during 1887-88:—

"The larger increase in the exportation of rice and paddy, both to home and foreign ports, is due to the good harvest in the Division generally. Last year the inundation in the Brahmanberiah sub-division attracted much of the surplus rice of the south of Tipperah and Noakholly northwards, while in the present year Chittagong has been the only market, the Calcutta demand being weak. Here the demand for export was very brisk, and the merchants were willing to buy much more than they could get; but importation was, as before remarked, impossible owing to the unsettled state of the weather in the Bay of Bengal."

The surplus of imports by country boats, over exports by sea to foreign countries during the past three years, was as follows:—

		1885-86.	1886-87.	1887-88.
Rice	Cwts.	214,710	633,954	331,353
	Mds.	2,92,245	8,62,883	4,51,009

	Mds.	9,52,463	6.52 229	7,39,116

The quantities of rice and paddy sent to the different coast ports in India from Chittagong during the past three years are detailed below :—

		1885-86.	1886-87	1887-88
Rice	Cwts.	208,255	31,597	217,940
	Mds.	2,83,458	43,007	2,96 640
Paddy	Cwts.	432,088	75,270	309 033
	Mds.	5,88,120	1,02,461	4,20 628

These supplies went chiefly to Cochin and Bombay owing to the better markets provided at those places.

12. *Hides and skins.*—The quantity exported from Chittagong in connection with its coasting trade amounted in value to Rs. 2,64,451, against Rs. 2,23,847 in 1886-87, and Rs. 2,01,905 in 1885-86. It is stated that the cattle disease prevalent during the previous two or three years disappeared in the year under report.

13. *Oils.*—The total value of oils imported by coasting vessels was Rs. 78,038, shewing a decrease of Rs. 28,410 and Rs. 34,173 on the figures for 1886-87 and 1885-86, respectively. The imports by country boats, however, rose from 5,136 maunds in 1885-86, and 5,510 maunds in 1886-87, to 9,478 maunds in 1887-88.

14. *Salt.*—The imports of salt into Chittagong by sea were comparatively small during the year, namely, 3,48,060 maunds against 3,51,272 maunds in 1886-87, and 2,69,088 maunds in 1885-86. The Commissioner of the Chittagong Division writes :—

"The small decrease in the importation of salt is due to the increase of duty having taken effect so near the close of the year. The bonders here had been trusting to buy a cargo afloat, but the increase of duty made salt afloat, on which the increased duty could not be levied, so valuable to the holders, that they would only sell on terms which the dealers here would not give."

The amount of salt exported by country boats was 2,71,240 maunds, against 3,48,600 maunds in the preceding year, and 1,45,497 maunds in 1885-86 ; the distribution of the exports during the past three years is shown below :—

	1885-86	1886-87	1887-88
	Mds	Mds	Mds
To Chittagong	1,01 557	1 68,566	1,35 624

„ Other districts	5,306	6 682	3 520
Total	1 45,497	3 48 600	2 71 240

In addition to the above quantities, the supply carried to Naraingunge by coasting vessels was 1,21,657 maunds, against 1,59,412 maunds in 1886-87, and 1,24,786 maunds in 1885-86.

15. *Mustard and rape seed.*—The quantity sent to Chittagong by country boats was 11,652 maunds, showing a slight decrease of 4,108 maunds and 3,044 maunds on the figures for 1886-87 and 1885-86, respectively. The falling off in this trade last year is attributed by the Collector of Customs, Chittagong, "to larger importation in the previous year, and partly to boats loaded with these seeds escaping registration."

16. *Spices.*—The imports of betel-nuts by country boats amounted to 23,430 maunds, being 16,885 maunds below the figures for 1886-87, but 11,035 maunds in excess of those for 1885-86. Last year the yield of betel-nuts in the Chittagong Division was excellent, and above the average. "Other kinds" of spices also shewed a decrease of 6,058 maunds on the returns of 1886-87, and an increase of 1,709 maunds on those of 1885-86. This decrease is said to have been due to the large imports of the previous year. In connection with the coasting trade, the imports of spices showed a falling off of Rs. 18,784 in value as compared with those of the preceding year, due "partly to larger importation in the previous year, and partly to less local demand, owing to good chilly crops." In the exports, too, there was a slight falling off owing to smaller supplies of chillies having been sent to Naraingunge.

17. *Sugar.*—The fluctuations in the import sugar traffic carried by country boats during the past three years, are shown in the following statement :—

	1885-86.	1886-87.	1887-88.
	Mds.	Mds.	Mds.
Sugar, drained	7,653	5,663	3,700
" undrained	40,559	43,084	33,926

The imports by coasting vessels from Naraingunge and Calcutta during the past year also showed a slight decrease, the total value amounting to Rs. 73,086 against Rs. 88,270 in 1886-87, and Rs. 83,679 in 1885-86.

18. *Tea, (Indian.)*—The quantity exported from Chittagong in connection with its coasting trade showed an increase of 89,441 lbs. in comparison with 1886-87, and 169,888 lbs. as compared with 1885-86. The money value of this trade during the past year was Rs. 5,97,871, against Rs. 5,82,162 in 1886-87, and Rs. 6,79,699 in 1885-86. The increase in the value of the tea exported was only Rs. 15,709, owing to the poor prices realized.

19. *Tobacco.*—Owing to increased local production, less tobacco was imported into Chittagong from Naraingunge during the past year than in either of the two preceding years, as the following statement will show :—

Year	By country boats.	By sea-going vessels.	Total.
	Mds.	Mds.	Mds.
1885-86	6,555	13,936	20,491
1886-87	10,300	10,478	20,778
1887-88	6,300	7,379	13,679

The exports of tobacco to foreign ports aggregated 26,573 lbs. against 1,521 lbs. in 1886-87, the increase being due to larger shipments made to the Maldives.

CHAPTER XII.

SEA-BORNE TRADE OF ORISSA.

THE gross value of the sea-borne trade of the Orissa ports, exclusive of Government transactions, registered during the past year, as compared with the totals of the preceding two years, was as follows :—

It will be seen that the total value of the goods traffic during 1887-88 was 3·68 per cent. below the figures for 1886-87 and 22·86 per cent. below those for 1885-86. The import trade fell off by 6·91 per cent. in comparison with that of the previous year, and by 19·26 per cent. as compared with that of 1885-86. Under exports, the value shown was on a level with the figures of the preceding year, but it showed a decrease of 31·72 per cent. on the returns of 1885-86.

2. The gross trade of Balasore showed a decrease of 7·99 per cent. under imports, and an increase of 11·20 per cent. under exports as compared with the figures of 1886-87. As regards Cuttack, the falling off in the imports was 40·77 per cent. and in the exports 19·02 per cent., while in the case of Pooree there was very little fluctuation in the import trade, but in exports an advance of 9·26 per cent. is shown on the returns of the previous year. The direction of the trade during the past three years is illustrated in the subjoined table :—

Imports into Orissa.

4. *Cotton twist and yarn.*—The total quantity of European cotton twist and yarn showed an increase of 4,357 maunds as compared with 1886-87 and of 4,161 maunds as compared with 1885-86. On the other hand, the imports of Indian twist and yarn exhibited a decrease of 1,492 maunds and 7,035 maunds in comparison with those years, respectively.

5. *Cotton piece-goods.*—The total amount of European piece-goods registered during the year was valued at Rs. 16,55,375, showing an excess of Rs. 3,41,492 worth of goods on the returns of 1886-87, and a falling off of Rs. 68,433 as compared with 1885-86. The value of Indian piece-goods imported during the year was Rs. 21,688, against Rs. 8,027 in 1886-87, and Rs. 950 in 1885-86.

6. *Gunnies.*—There was some recovery in this trade, the number of gunny-bags imported being 1,154,743, against 1,089,689 in 1886-87, and 2,089,825 in 1885-86.

7. *Metals.*—This trade fell off from 38,837 maunds in 1885-86 and 31,962 maunds in 1886-87, to 18,282 maunds in 1887-88. The imports of brass and copper were 53·72 per cent. below the preceding year's figures, while iron showed a decline of 10·38 per cent.

8. *Oils.*—The total importation of oils showed a heavy falling off of 40,883 maunds on the trade of 1886-87, and of 12,332 maunds on that of 1885-86.

9. *Ghee.*—The amount of ghee imported during the year was 1,474 maunds against 1,230 maunds in 1886-87, and 2,000 maunds in 1885-86.

10. *Spices, betel-nuts, and tobacco.*—In spices, the imports were less than the figures for 1886-87 and 1885-86 by 14,638 maunds and 7,249 maunds, respectively. The fluctuations under tobacco and betel-nuts are not important, the condition of the trade being almost stationary.

11. *Salt.*—The total quantity of salt imported during the past year was 1,57,469 maunds against 1,42,018 maunds in 1886-87, and 40,752 maunds in 1885-86. In his report for 1886-87, the Collector of Balasore remarked that Liverpool salt was driving the locally-manufactured article out of the Balasore market.

12. *Treasure.*—The figures under this head have steadily fallen from Rs. 7,85,420 in 1885-86 and Rs. 2,84,459 in 1886-87, to Rs. 1,25,500 in 1887-88.

Exports.
